Helping 3rd Graders to Victory

Our class has been reading articles about House Bill 4822 or the 3rd grade Reading Bill. House bill 4822 holds back 3rd graders if they didn't get to a certain level. I am for house Bill 4822 of holding 3rd graders back if they did not reach the level they are supposed to reach because, The Michigan ***Senate*** said, "With requirements that additional intervention' programs be created, (including summer school) and individual tutoring provided before a student is actually held back."And being held back would make the kid smarter because even if the kid is in a different class or the same, He/she would be smarter. Also, if you let them go to 4th grade and they didn't get 3rd grade it would put too much stress on him or her. It would be like if someone was not good at chess and went against a pro he or she would fail. This is why I am for House Bill 4822. Please help 3rd graders improve their reading.
