Economic Review

- In September 2010, the National Bureau of Economic Research announced that the U.S. recession ended in June 2009.
- The 2008-2009 recession was identified as the most severe economic contraction in 70 years.
- During 2010, the U.S. economy is expected to show the strongest growth since 2004, while the Michigan economy is expected to finally finish contracting.
- Michigan's economy is forecast to exhibit both income and employment growth by 2012, although the improvements will be modest.
- Inflation-adjusted personal income is projected to have risen 0.9% in 2010, and then forecast to remain stable in 2011 and increase 0.7% in 2012.
- Payroll employment is expected to remain flat in 2011, after declining by 0.8% in 2010, and then increase 0.9% in 2012. The projected increase in wage and salary employment for 2012 would be the first increase since 2000.
- In Michigan, higher vehicle sales, stability in the housing market, and an improved national economy are expected to allow the unemployment rate to decline, from 13.6% in 2009 and 13.3% in 2010, to 12.4% in 2011 and 11.6% in 2012.
- Compared with the May 2010 Consensus Economic Forecast, the U.S. forecast is slightly weaker while the Michigan forecast is slightly stronger.
- Table 1 summarizes the SFA's economic projections for calendar years 2009 through 2012.

Forecast for State Revenue

- The percentage changes in baseline General Fund/General Purpose (GF/GP) and School Aid Fund (SAF) revenue for FY 2009-10 through FY 2011-12 are compared with the actual growth rates during the preceding 20 years in Figure 1.

Figure 1

- The increases in baseline revenue estimated for FY 2010-11 and FY 2011-12 represent the first increases in several years. Table 2 provides a summary of the SFA's FY 2010-11 and FY 2011-12 GF/GP and School Aid Fund revenue estimates.
- As Table 2 indicates, FY 2010-11 GF/GP revenue is estimated to increase by 4.2% over FY 2009-10 and SAF revenue is estimated to increase by 1.2%. For FY 2011-12, after accounting for tax changes, GF/GP revenue is estimated to decline by 0.5% while SAF revenue will increase by 1.8%.
- The stronger economic fundamentals for FY 2011-12 will be offset by several tax policy changes that will reduce GF/GP and School Aid Fund revenue. Among the expected changes are:
 - The State income tax rate is scheduled to fall by 0.1% starting October 1, 2011, and will continue falling by 0.1% annually until it returns to the 3.9% level in 2015. The 0.1% rate reduction will result in a loss of \$162.0 million in FY 2011-12.
 - The net revenue loss due to Michigan's film credits will increase to \$142.1 million, up from \$105.3 million estimated for FY 2010-11.

- Based on the SFA's revised revenue estimates, revenue subject to the Constitutional revenue limit is estimated to be more than \$8.0 billion over the limit for FY 2010-11 and FY 2011-12.

- The FY 2010-11 GF/GP budget is balanced using temporary Federal funds and other one-time revenue items. The combination of one-time revenue sources, the income tax rate reduction, and current law spending pressures creates a sizeable imbalance between projected current law FY 2011-12 GF/GP revenue and current law GF/GP appropriations. As Table 8 indicates, the SFA is estimating a potential GF/GP funding imbalance of \$1.8 billion.

- The outlook for the FY 2011-12 SAF budget is more favorable. The FY 2010-11 SAF budget is less reliant on temporary Federal funding and the SAF revenue base is held harmless from the impact of the scheduled rate reduction in the State income tax. Table 9 shows a potential FY 2011-12 SAF year-end balance of \$192.4 million, assuming current law revenue and a restoration to the FY 2008-09 per-pupil funding levels.
