

Good morning,

I understand the Senate Judiciary Committee will be discussing this egregious anti-choice bill this morning.

I urge the committee to oppose this offensive and condescending attack on women's reproductive health and dignity. Only women and their health care providers should be making reproductive healthcare decisions.

Politicians (in this case, men who will never face the complex reproductive issues that women do) should not. It is unspeakably irresponsible and arrogant to act otherwise.

Thank you,

Kimberli Cumming
