

Please Michigan Senate's Natural Resources, Environment and Great Lakes Committee, do not allow the WOLVES to be placed on the game list. they have just been removed from the endangered list. Please give them a chance. The farmers can already shoot, trap and poison any animal they want, we do not need a hunting season, if the farmers are already killing them and keeping the population down. Please don't allow this to happen. There are so many of us that are so tired of listening to people say Michigan is just a kill state. Pure Michigan is a joke. Please don't prove them right.

Thank You.
