## Media Statement

*FOR IMMEDIATE RELEASE*

“Hurley Medical Center is proud to be the safety net provider for this region for over 105 years. The Hurley family values the trust and support of the patients who entrust their care to Hurley, and the dedication of the physicians, staff and volunteers that serve Hurley's patients. As the region's premier public teaching hospital, Hurley provided \$72 million in uncompensated and charity care for the more than 60,000 under and uninsured residents in Genesee County in 2012. Hurley is one of the few public hospitals in the country that receives no funding from our local municipality. Hurley Medical Center also provides employment for 2,400 employees, and is one of Genesee County's largest employers, spending over \$13 million annually in Genesee County, and contributing \$1 million annually to the Flint tax base.”
