Re: Vote No on SB 0078 of 2013

Dear Committee members:

SB 0078 seeks to mandate willful ignorance in regard to the management of certain classes of public assets. For this reason alone SB 0078 deserves no further consideration in the state legislature.

Generations of Michigan citizens have consistently supported long-term investments in the conservation and restoration of our state's biodiversity, with these efforts guided by the best available science. In this context SB 0078 is more irritable gesture than policy formation, the intent of which seems to be to confound management of public resources and provide financial and ideological sops to a small number of special interests.

Vote NO on SB 0078.

Pure Michigan,

Scot Libants
