

Iron Labs LLC Position on HB 4271 and HB 5104:

HB 4271: Pro

HB 5104: Pro

Iron Laboratories is Michigan's largest cannabis testing lab. We have always promoted cannabis safety via testing. With HB4271 and HB5104 safe access for patients would be greatly improved. HB 4271 would mandate testing. Testing of cannabis is important because not only would patients be informed with potency levels of their med's, they would also be informed of any impurities. Impurities range from many forms of mold to infestation from spider mites and other insects that are often found in cannabis.

Furthermore, Iron Labs is in favor of HB 5104 as this bill would allow patients that are unable to smoke cannabis to medicate using alternative methods more suitable for patients who are concerned about ingestion of smoke. Iron Labs is well schooled in the understanding and accuracy of testing and patients seeking analysis of concentrated and infused forms of medicine would be informed as to the dosage of THC and CBD as well as other cannabinoids per serving.

Thank you for your time. For follow-up questions, Iron Labs can be reached at (248) 313-9000
