Re: Senate Bill 879

Dear Sirs:

As a radiologist, I am keenly aware of the benefits of alerting patients to their breast density. As you may know, dense breast tissue can mask malignant tumors on mammography. Dense breast tissue is also considered a risk factor for cancer. The implications of not making patients aware of this through mammography reports can have a significant impact on their lives. I urge you to support senate bill 879.

Sincerely,

Dilraj Ghumman, MD
