

3rd Grade Reading Bill

I have been researching about house bill 4822. This is getting kids held back in 3rd grade. I researched that getting held back what I'm going to talk to you about. I think it would be unfair because if they have 3rd grade again it would not be fun to do it again because I would not be that fun and all your friends would go to 4th grade. I believe house bill 4822 should not be a law. People would go to 3rd grade and your friends will be in 4th grade. Your friends will be sad your that you are in 3rd grade. Some students would feel like they are stuck in 3rd grade. 30% of students in 3rd grade did not pass the m-step test so if there are 20 kids in each class that leaves six kids will go back to 3rd grade. Eventually, class size will grow in 3rd grade and teachers will not get to the class. Also, cost will go up for materials. This is bad for kids! The teachers will not be able to get to everyone in class so all students will suffer. Teachers borrow activities so if the students is in 4th grade they could still be taught 3rd grade material. Holding students back would feel like they are stuck in 3rd grade. The government thinks they are helping but they are actually harming students. I believe that 3rd graders should not get held back to 3rd grade.
