

Say No to House Bill 4822

I have researched house bill 4822. House bill 4822 will hold back students in third grade who do not do well on M-Step. In my opinion I do not like house Bill 4822. The goal for the bill is to enact legislation to improve 3rd grade readers but the bill will only make it worse. First, 30% of students do not make it to 4th grade so if there were 20 students in each class that means 6 students will be held held back. That is so crazy! Eventually, the classrooms will get too crowded. Second, if I were held back in third grade for a year or two I would lose my friends this will make me so sad and angry. Finally, teachers borrow each

other's activities so 3rd grade could still learn
4th grade material. I believe that house bill 4822
is bad for students
