

3rd Grade Reading Bill 4822

During the month of January ,the Grand Rapids Press published an article about House bill 4822 this bill is very important but has not been noticed as much as flint and the water crisis i'm not saying flint is not important it still is just I think more people need to know about house bill 4822. The third grade reading bill is in the House of Representatives. This bill would hold back 3rd graders if they have a bad M-Step test grade. I believe that 3rd graders should be able to pass the 3rd grade. 30% of students in 3rd grade did not pass last year. This means that if there are 20 kids in each class, size will grow in 3rd grade. Class size will grow in third grade and. Teachers won't get to everyone. Costs might also go up for schools. Costs could go up because if you need more books or computers for 3rd graders. This is bad for kids and schools! The teacher will not be able to get to everyone in class so all students will suffer. The government thinks they are helping but they are actually harming the students. The government does not know what it is like to struggle in 3rd grade I just finished 3rd grade so I know how it feels. I believe that 3rd graders should not get held back just by not passing one little test.
