

Dear Senator Nofs, Senator Proos, and Senate Energy Committee Members,

My husband and I remain opposed to SB 438 for the same reasons mentioned in our previous letter to you and the committee which was placed in the testimonial record on May 5, 2016. I'm writing again because it was listed in the record as neither pro or con. Therefore I am clarifying that our position is opposition to this bill. We strongly feel that net metering needs to continue indefinitely, not for just ten years or other specified time limit. Even with net metering we still pay all the other charges that are not direct use of kilowatt hours, but to cover our use of being connected to the grid infrastructure.

Thank you.

Sincerely,

Florence and Donald Cutter
