

The Honorable Michael Nofs
P.O. Box 30036
Lansing, MI 48909-7536

March 25, 2016

Dear Chairman Nofs,

I wish to express my support to your energy legislation – Senate Bill 437 and hope that will put Michigan right on top. Humworld Inc firmly supports this cause which will bring about a change in our future energy policy.

The next few years will give Michigan a chance to transform its electric generation landscape into a cleaner, more diverse portfolio. This transformation must be driven primarily by significant capital investments in our state' energy infrastructure. These investments are necessary in maintaining the same standard of service we enjoy every day.

Being a company that represents the businesses within the energy efficiency sector in Michigan, we are excited about these opportunities and what they could mean for our future business. We support your effort towards reducing energy waste. Michigan's next energy policy must build in flexibility to ensure additional investments in energy efficiency are done in a holistic and cost-effective way. This flexibility is critical toward accounting for changing market conditions, emerging environmental regulations and new technologies.

We are confident that with these important energy policy reforms, Michigan's future will be more brighter.

Sincerely,

Venkataraman Soundararajan

President,

Humworld Inc, 20689 Josie Ct, Livonia, MI 48152.
