

Please DO NOT fast track Senate Bill 637. This is an extremely dangerous bill that will forcibly irradiate the populous to 5G, which has never been independently been tested for safety - but prior research shows us that far less dangerous frequencies are very dangerous to health! These same frequencies are used in crowd control and military weapons. Have common sense - do you want to legalize biological weapons? It sounds ridiculous but that's what SB637 would do,

California Governor Brown recently vetoed CA SB649, basically their version of what SB637 is now. Please do the right thing and vote no on this TERRIBLE ATROCIOUS BILL now. It will save us all a lot of pain in the future.

I suspect others may be asking you to pause this bill until independent safety testing can be done. All that testing will do is confirmed that 5G is pretty seriously dangerous stuff (but we already know that, duh). This bill should not be paused, it should be killed.

Thank you,

*Naveen Albert*
