The purpose of this document is to provide information regarding Synthetic Nicotine. While a basic overview, it will answer most questions regarding our manufacturing process.

Tarot Labs Inc. of Commerce Township, is one of the country's Premiere E-Liquid manufactures. Some in the industry use unique process for constructing products with TFN® Nicotine which is a groundbreaking 100% synthetic nicotine base that is odorless, colorless and tasteless. TFN® Nicotine is produced at Next Generation Labs for use in E-Liquid Manufacturing. TFN® Nicotine is the first significant change to vaping in many years. TFN® gives the consumer an alternative to tobacco or vape products containing tobacco sourced nicotine, while still enjoying the nicotine experience.

Our products were developed for Adults over the legal smoking age to have a safer alternative to combustible tobacco cigarettes.

Provided below is a breakdown of the chemical composition of our Tobacco Free Product. In accordance with federal regulations, all our products are registered with the United States Food and Drug Administration.

The following is the ingredient listing for the one of our E-Liquids.

Flavor Name: Tarot Labs – Magician

Flavor Profile: Chilled Peach & Dragon Fruit

Most Common Nicotine Strength: 3mg

Ingredients: Propylene Glycol, Vegetable Glycerin, Natural & Artificial Flavorings, May contain TFN® Nicotine.

Description of Added Ingredients:

Propylene Glycol – Used as a flavor carrier. Commonly found in Drink Mixes, Dressings, Dried Soups, Cake Mix, Soft Drinks, Bread and Dairy products.
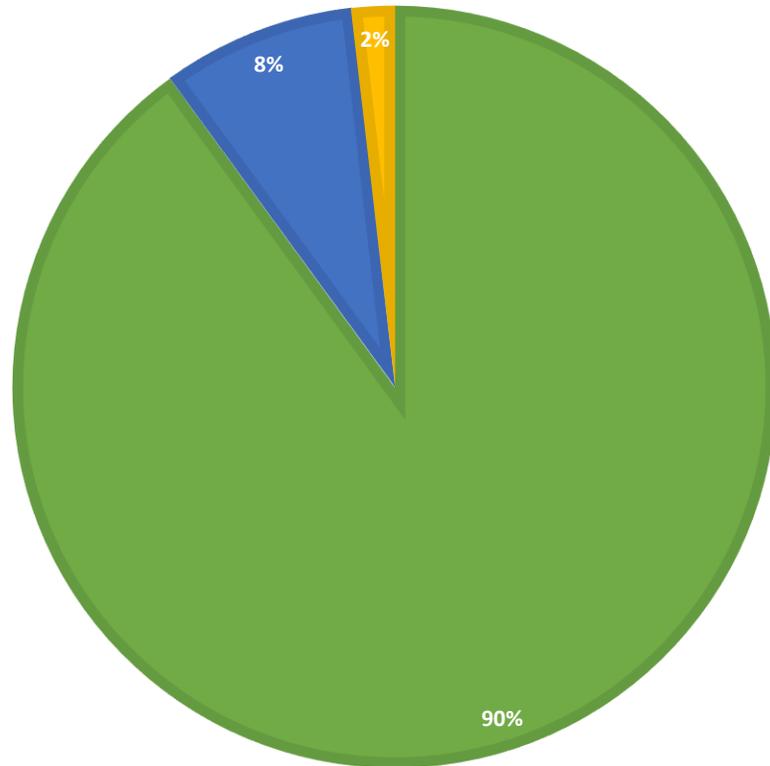

Vegetable Glycerin – Used to create exhaled vapor. Commonly found in Milk, Whey Products, Pudding, and Dairy-Based Drinks.
Processed Meat and Poultry, Soybean Products, Processed Seafood, Dried Eggs, Canned Eggs and Egg-Based Desserts can contain this additive as well.

Natural & Artificial Flavorings – Used to add Flavor. Commonly found in the flavoring constituents derived from a Spice, Fruit or Fruit Juice, Vegetable or Vegetable Juice, Roots and Leafs.

TFN® Nicotine - This novel process is a multi-step sequence of chemical reactions pioneered by Next Generation Labs has been established, refined and completely developed to an industrial production scale process. The starting materials and the reagents used in the multi-step chemical transformations are not derived from tobacco. The nicotine produced from this patented process is named TFN® Nicotine. TFN Nicotine is a unique nicotine since it is highly purified to ensure greater than 99.5% USP standards. Also important, TFN brand nicotine, is completely synthetic.
