Senate Fiscal Agency

THE SENATE FISCAL AGENCY

The Senate Fiscal Agency is governed by a board of five members, including the majority and minority leaders of the Senate, the Chairperson of the Appropriations Committee of the Senate, and two other members of the Appropriations Committee of the Senate appointed by the Chairperson of the Appropriations Committee with the concurrence of the Majority Leader of the Senate, one from the minority party.

The purpose of the Agency, as defined by statute, is to be of service to the Senate Appropriations Committee and other members of the Senate. In accordance with this charge the Agency strives to achieve the following objectives:

1. To provide technical, analytical, and preparatory support for all appropriations bills.
2. To provide written analyses of all Senate bills, House bills and Administrative Rules considered by the Senate.
3. To review and evaluate proposed and existing State programs and services.
4. To provide economic and revenue analysis and forecasting.
5. To review and evaluate the impact of Federal budget decisions on the State.
6. To review and evaluate State issuance of long-term and short-term debt.
7. To review and evaluate the State's compliance with constitutional and statutory fiscal requirements.
8. To prepare special reports on fiscal issues as they arise and at the request of members of the Senate.

The Agency is located on the 8th floor of the Victor Office Center. The Agency is an equal opportunity employer.

IMPLICATION FOR PROPERTY TAXES ON REAL PROPERTY	22
CONCLUSION	24
APPENDIX	25

INTRODUCTION

Property taxes on personal property have long been a source of controversy for both taxpayers and tax assessing jurisdictions. In the current legislative session, Senate Bill 34 and Senate Bill 142 have been introduced to eliminate or reduce taxes levied on personal property. This issue paper attempts to help inform the debate by providing substantial detail on the impact of personal property taxes on taxing jurisdictions.

BACKGROUND ON PERSONAL PROPERTY TAXATION

Michigan groups property as either real property or personal property. Real property is generally defined as land, as well as any buildings and fixtures located on the land. Personal property is generally property that is not affixed to a structure, such as machinery, equipment, and furniture, although Michigan statute also includes interests in real property and other types of property, such as certain tombs and vaults or wind energy systems. A wide variety of personal property is exempt from property taxes, due to either the nature of the property owner, or the type of property, or a combination of both factors. Among the varieties of personal property exempt under Michigan law are personal property owned and used by a householder and household furnishings; personal property owned by banks and charitable, educational, and scientific institutions incorporated under Michigan law; and types of property such as methane digesters, fire engines and fire extinguishing equipment owned by a fire company, water conditioning systems used for residential dwellings, and certain working tools owned by a mechanic.

Personal property is taxed based on its taxable value, like real property, although the value of personal property generally depreciates over time while the value of real property generally appreciates over time. For personal property, the value is generally determined by acquisition cost less depreciation, which is determined using depreciation multipliers. The State Tax Commission issues multiplier tables for use in assessing the value of personal property. As a result of the differences in the way values change over time, personal property represents a declining share of total taxable value ([Figure 1](#)). Personal property comprised 12.7% of total taxable value in Michigan in 1999, but only 8.3% in 2010 ([Figure 2](#)).

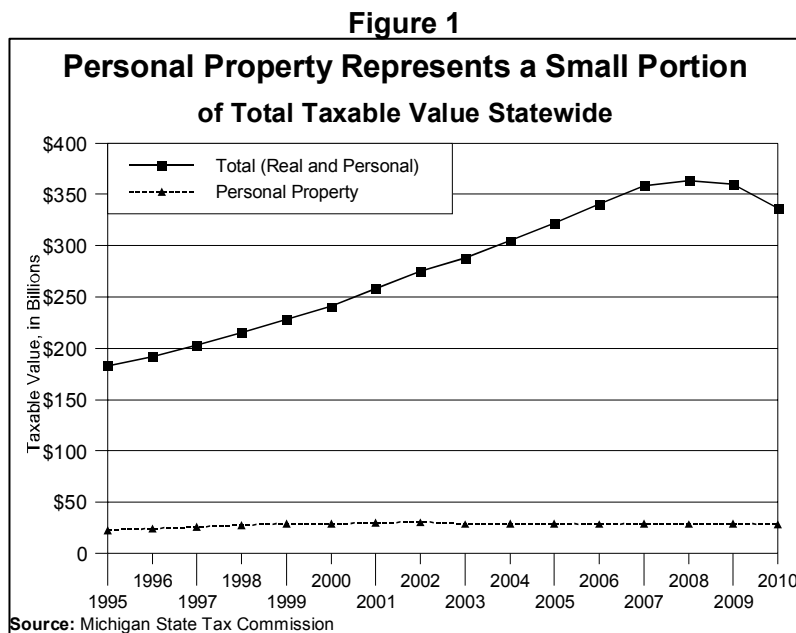

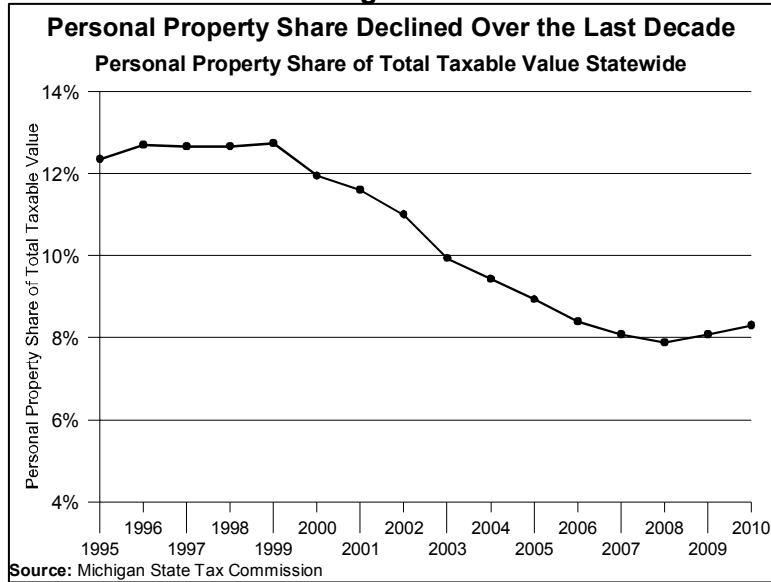

Figure 2

Like real property, personal property is categorized based on its use, and the categories for personal property are agricultural, commercial, industrial, residential, and utility (Figure 3). Real and personal property comprise different shares of each class of property, with real property comprising the entirety of agricultural and residential property and personal property comprising the entirety of property classified as utility property. (Most real property owned by utilities actually ends up classified under industrial property.) Personal property represents approximately 16.0% of commercial property, and approximately 34.8% of industrial property (Figure 4).

While some categories of personal property, such as agricultural and residential, are completely exempt from taxation, other categories are exempt only from certain levies. For example, industrial personal property is exempt from the State Education Tax and from the 18 mills that are levied by local school districts for operating purposes, and commercial personal property is exempt from 12 of the 18 mills levied by local school districts for operating purposes. Table 1 illustrates the taxable nature of different classes of property by different taxing authorities and different levies.

Source: Senate Fiscal Agency

Absent any special exemption or treatment, such as the levies applied to industrial personal property or the exemption of agricultural personal property, personal property is taxed the same as real property. Real property generates the majority of property tax revenue in Michigan (Figure 5), and the relative differences in the amount of property and the applicable tax levies generate different shares between the tax revenue generated and statewide taxable value (Figure 6). Any taxing jurisdiction that levies property taxes receives property tax revenue from personal property to the extent there is personal property within the unit. Local school districts, intermediate school districts (ISDs), counties, cities, villages, townships, community colleges, and authorities such as transit authorities, library authorities, and police and fire authorities, all receive revenue from property taxes levied on personal property. In addition, these levies are subject to tax increment captures, so entities such as downtown development authorities (DDAs) and tax increment financing authorities (TIFAs) also receive revenue from personal property taxes. The State receives tax revenue from personal property taxes, as well, through the State Education Tax (the portion levied on commercial and utility personal property), through property taxes applied to State-assessed property, such as the taxes on telephone and telegraph companies, and through property that is subject to the Industrial Facilities Tax.

Figure 5

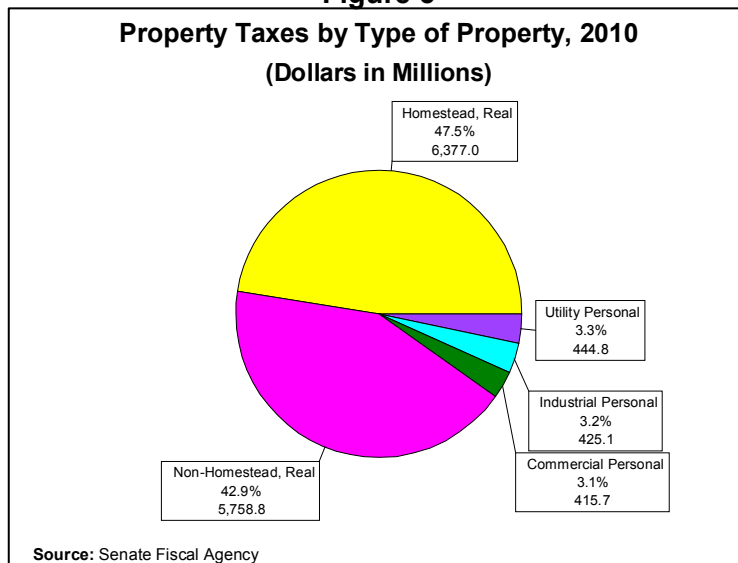

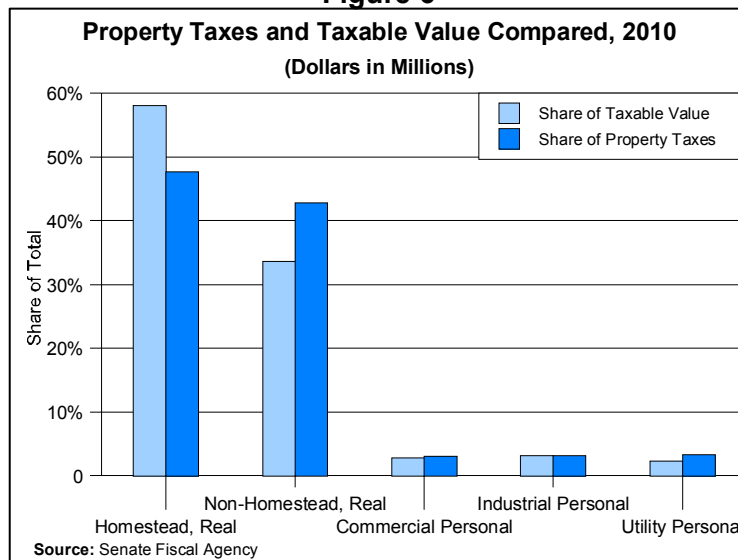

Figure 6

Under the Michigan Business Tax (MBT), taxpayers were eligible for credit equal to a portion of property taxes levied on industrial personal property and utility personal property. A similar credit was not adopted as part of the Michigan Corporate Income Tax scheduled to take effect January 1, 2012, and there is no similar credit for businesses such as sole proprietorships, partnerships, and S-corporations that must pay taxes on their business activity under the Michigan Individual Income Tax.

MAGNITUDE AND DISTRIBUTION OF PERSONAL PROPERTY TAXES

Property taxes generate substantial revenue for a variety of entities and purposes. Figure 7 illustrates the distribution between different types of taxing entities, when property taxes are considered as a total. Table 2 provides an additional breakdown of the revenue generated from different classes of property by different types of levies. Because of the differing rates and exemptions for personal property taxes, personal property taxes exhibit a different distribution based on the levying authority or purposes of the levy (Figure 8). Furthermore, the distribution of taxes levied on personal property differs based on the type of personal property (Figure 9).

Total ISD	\$731.1	\$424.9	\$35.5	\$37.8	\$6.5	\$1,235.8
Community Colleges¹⁾						
Operating Mills	\$316.7	\$193.2	\$17.4	\$18.3	\$3.1	\$548.7
Debt/Capital Improvement	\$9.5	\$5.7	\$0.5	\$0.3	\$0.1	\$16.1
Total Community Colleges	\$326.2	\$198.9	\$17.8	\$18.7	\$3.3	\$564.8
Total For Categories Listed Above	\$6,377.0	\$5,930.8	\$415.7	\$425.1	\$272.8	\$13,421.4
State Total (adjusted for all Utility Personal Property)	\$6,377.0	\$5,758.8	\$415.7	\$425.1	\$444.8	\$13,421.4

¹⁾ Utility personal property is only available at the county/city/township level. Except for the "State Total (adjusted for all Utility Personal Property)" line, amounts shown include only those local units with a single school district within the unit's boundaries, and thus underestimate the totals for those lines. Taxes on utility personal property that were able to be allocated to these units accounted for only \$2.1 billion of the total \$7.7 billion in utility personal property taxable value statewide, and \$60.9 million of \$232.6 million in personal property taxes levied by these units. The estimates in this table are not adjusted so that they sum to the property total, and instead represent the minimum totals for these categories. Revenue from utility personal property not attributable to individual local units is included in the "Real Other" category, except for the "State Total (adjusted for all Utility Personal Property)" line, which correctly adjusts the categories for the statewide total.

Source: Senate Fiscal Agency

Figure 9

As shown in Table 3, based on 2010 taxable values and tax rates, the Senate Fiscal Agency estimates that personal property taxes totaled approximately \$1.3 billion in calendar year 2010, and were offset by \$145.7 million in MBT credits. Table 4a provides a breakdown of personal property taxes, by taxing authority, excluding villages and local school district recreation mills, although there are estimation issues with the taxes paid on utility personal property (further discussed in the next paragraph).

Table 3

Estimated Calendar Year (CY) 2010 Personal Property Taxes	
	Estimated CY 2010 Personal Property Taxes (millions)
Personal Property Taxes Paid	
Commercial	\$415.7
Industrial Ad Valorem	\$331.1
Industrial Facilities Taxes (IFT)	94.0
Industrial Subtotal	\$425.1
MBT Credit (35%)	(138.6)
Net Industrial Personal Property Taxes	\$286.5
Utility (Locally Assessed)	\$392.1
State Utility Property Tax	\$52.7
MBT Credit (13.5%)	(7.1)
Net State Utility Property Tax	\$45.6

1) "Other Local Units" includes authorities and local school district recreation mills. Levies attributable to villages are not included in the table. 2) Utility personal property is available only at the county/city/township level. Except for the "Total Utility Personal Property" line, amounts shown include only those local units with a single school district within the unit's boundaries, and thus underestimate the totals for those lines. Taxes on utility personal property that were able to be allocated to these units accounted for only \$2.1 billion of the total \$7.7 billion in utility personal property taxable value statewide, and \$60.9 million of \$232.6 million in personal property taxes levied by these units. The estimates by taxing unit in this table are not adjusted so that they sum to the property total, and instead represent the minimum totals for these categories, excluding the \$171.7 million in personal property taxes that cannot be precisely allocated to taxing units.

Source: Senate Fiscal Agency

Taxable values for utility personal property are available only for counties, cities, and townships. As a result, the detail for utility personal property in Tables 2 and 4a understate the true totals, because only approximately \$2.1 billion of the \$7.7 billion in utility personal property taxable value can be accurately allocated to units such as school districts, ISDs, and community colleges. These understated amounts should be interpreted as the minimum impact of utility personal property taxes on the local unit. Out of the taxable values that can be accurately allocated to school districts, ISDs, and community colleges, the resulting personal property taxes account for approximately \$60.9 million of the estimated \$232.6 million in personal property taxes levied on utilities by these entities. Table 4b attempts to adjust for the lack of data, inflating the minimum figures in Table 4a by a factor that reflects the average shortfall statewide in the estimate. However, because this adjustment may attribute utility personal property to the wrong entity, the adjusted estimates only represent a general approximation of the distribution of utility property taxes.

Taxable values, by class of property, are not available for villages. As a result, while personal property taxes undoubtedly contribute to villages' tax revenue, villages and any personal property taxes they receive are omitted from this report.

Property taxes on personal property, like other business costs and taxes, will affect the underlying cost structure for taxpayers. In the case of commercial and industrial taxpayers, the ability to pass such costs onto customers is more constrained than for utilities. Unlike utilities, where utility rates are generally approved by a regulatory authority to guarantee a return to the utility (and thus the tax burden on utility personal property is included in the rates charged to customers), commercial and industrial taxpayers have no such guarantee incorporated into the prices they charge customers. However, with the deregulation that exists in many utility markets, such taxpayers are not completely insulated from the impact of personal property taxes on their cost structures. It should be noted that Michigan classifies real property owned by utilities as industrial real, so while Figure 4 appears to suggest that exempting utilities from personal property tax would effectively exempt them from property taxes, utilities would continue to pay taxes on their real property, just as other taxpayers do. (As mentioned earlier, most real property owned by utilities is classified as industrial, and thus is included in the industrial real portion of Figure 4.)

Figure 8 illustrates the distribution of personal property taxes across different types of levies. As shown in Table 4b, the greatest share of personal property taxes goes to provide revenue for county, city, and township operating purposes, with these local units receiving an estimated \$456.9 million from personal property taxes in 2010 -- approximately 35.5% of all personal property taxes paid in Michigan. Local school operating taxes on personal property, mostly levied on nonhomestead property, generated approximately \$225.7 million in revenue in 2010. Because of the way in which foundation grants are computed under the School Aid Fund, this revenue represented \$225.7 million the State did not have to spend in order to maintain the per-pupil foundation allowances set under statute.

Table 4b also indicates that in 2010 property taxes on commercial and industrial property provided approximately \$99.2 million in revenue to pay local school district debt, \$0.2 million for ISD debt, \$0.8 million for community college debt, and \$25.5 million for county, city, and township debt. Property taxes on commercial and industrial personal property accounted for \$79.6 million of local school operating mills, and thus reduced School Aid Fund expenditures by that amount when payments were calculated to meet per-pupil funding guarantees. The School Aid Fund also received approximately \$57.8 million in State Education Tax revenue from commercial personal property. Property taxes on commercial and industrial personal property also accounted for \$73.1 million in operating revenue for ISDs, \$35.7 million in operating revenue for community colleges, and \$351.1 million in operating revenue for counties, cities, and townships. These estimates exclude the impact of taxes on utility personal property and, as indicated earlier, the impact of personal property taxes on villages.

Except for the "Total Utility Personal Property" line, amounts shown include only those local units with a single school district within the unit's boundaries, and thus underestimate the totals for those lines. Taxes on utility personal property that were able to be allocated to these units accounted for only \$2.1 billion of the total \$7.7 billion in utility personal property taxable value statewide, and \$60.9 million of \$232.6 million in personal property taxes levied by these units. The estimates in this table are adjusted so that they sum to the property total.</p>	

Source: Senate Fiscal Agency

Individual local units' reliance on personal property taxes varies significantly between units, including school districts. Smaller and more rural local units generally are less reliant on personal property taxes than are more developed urban areas, although there are exceptions, particularly when a major facility like a power plant or large manufacturing facility is located in a small or rural area. The reliance of local school districts on commercial personal property taxes varies significantly (Figure 10). Among local school districts, the Memphis Community Schools district exhibits the greatest reliance on commercial personal property taxes, which in 2010 accounted for 14.7% of its local levy for school operating purposes, while the River Rouge City Schools district exhibits the greatest reliance on industrial personal property taxes, which account for 14.7% of its local levy for school operating purposes. Few school districts are reliant on industrial personal property taxes for operating purposes because industrial personal property is exempt from the 18 mills that local school districts may levy on nonhomestead property for operating purposes. However, as a result of property tax reforms and school funding changes enacted in 1994 as a result of Proposal A, some school districts are able to levy "hold-harmless" mills. Because industrial personal property is not exempt from these hold-harmless levies, districts that levy hold-harmless mills still exhibit some reliance on industrial personal property for operating purposes. Property taxes on commercial personal property accounted for 10% or more of property tax revenue received for operating purposes in three of the State's 551 local school districts in 2010, between 5% and 10% in another 14 districts, and between 3% and 5% in 114 districts (Figure 11). In the remaining 420 local school districts, commercial personal property taxes accounted for less than 3.0% of the property tax revenue received for operating purposes.

Figure 10

Unlike the exemption industrial personal property receives from the 18 mills levied by local school districts for operating purposes, mills levied to pay local school district debt are applied to all types of property. Like the mills applied for operating purposes, the reliance on personal property taxes to pay local school debt varies substantially across districts (Figure 12). Commercial personal property taxes accounted for 11.9% of the property tax revenue the Southfield Public School District received to pay toward debt in 2010, while industrial personal property taxes accounted for 42.8% of the property tax revenue the Ecorse Public School District received to pay debt. In 2010, personal property taxes on commercial and industrial property accounted for more than 10.0% of the property taxes received to repay debt in 50 local school districts, between 5.0% and 10.0% in 114 districts, between 3.0% and 5.0% in another 120 districts (Figure 13). In the remaining 268 local school districts, commercial and industrial property taxes accounted for less than 3.0% of the property tax revenue received for debt repayment.

Figure 11

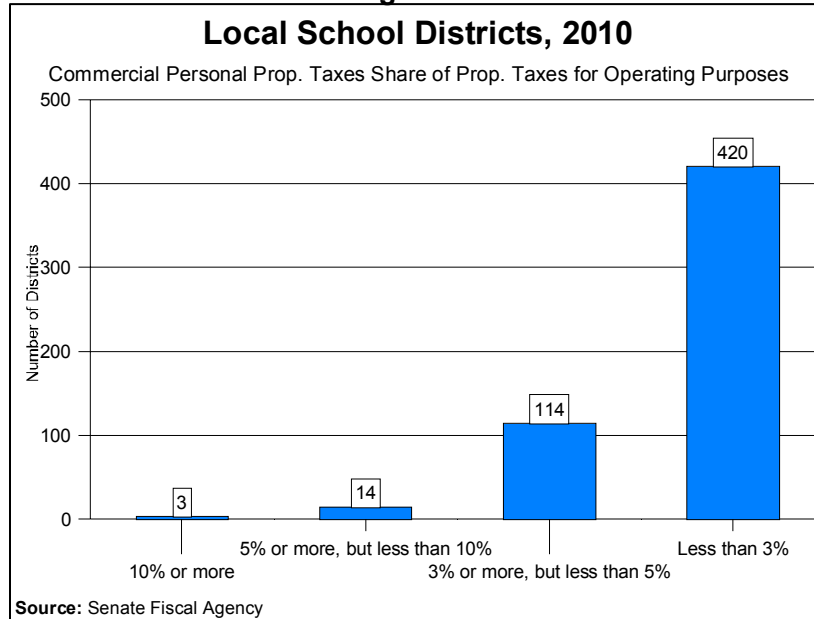

Figure 12

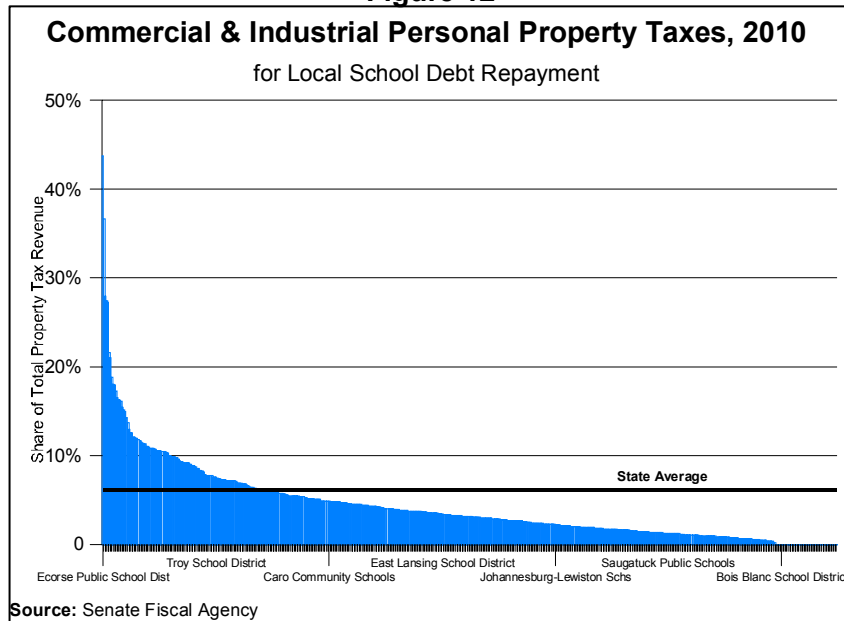

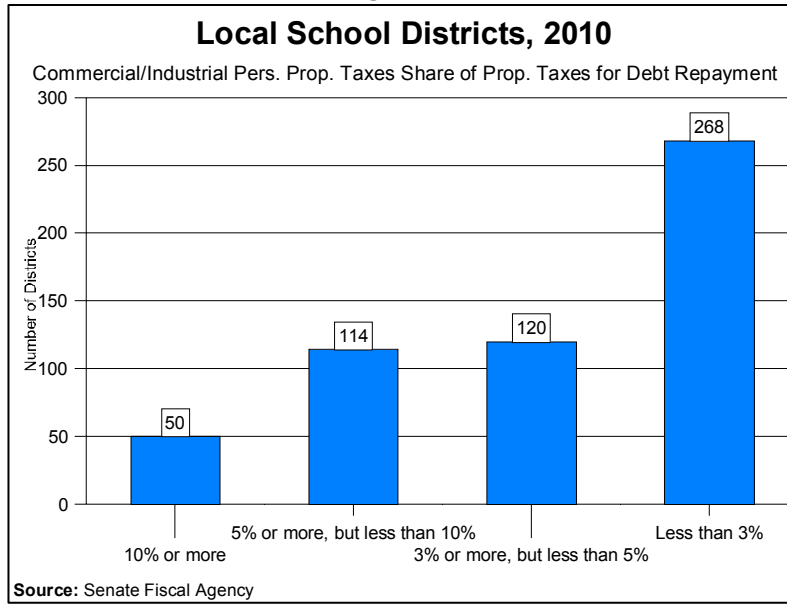

Table 5 (in Appendix) provides data on the impact of personal property taxes on revenue received for operating purposes, by local school district and type of personal property. Table 6 (in Appendix) provides similar data but for property taxes received for debt repayment. As indicated earlier, it is not possible to fully estimate the impact of property taxes on utility personal property on a district-by-district basis. The estimates shown in Table 5 and Table 6, as discussed in each table's notes, show the minimum impact for each local school district. The totals at the end of the tables show the total for the minimum figure, as well as an adjusted total for the State that reflects all utility personal property. On average, utility personal property is estimated to account for 6.1% of property tax revenue received by local school districts for operating purposes in 2010, and 2.6% of the property tax revenue received to repay debt.

Figure 13

Reliance on personal property taxes also varies substantially among ISDs, although the variance is less than for local school districts (Figure 14). Among intermediate school districts, the Wayne County ISD exhibited the greatest reliance on commercial personal property taxes, which accounted for 3.9% of its local levy for operating purposes in 2010, while the Midland ISD exhibited the greatest reliance on industrial personal property taxes, which accounted for 10.4% of its local levy for operating purposes. Combining commercial and industrial personal property taxes, personal property taxes accounted for more than 10.0% of property tax revenue received for operating purposes at three ISDs, between 5.0% and 10.0% in 20 ISDs, and between 3.0% and 5.0% in 22 ISDs (Figure 15). In the remaining 14 ISDs, commercial and industrial property taxes accounted for less than 3.0% of the property tax revenue received for operating purposes. Property taxes levied for operating purposes included allocated mills as well as mills levied to fund vocational education and mills levied to fund special education programs.

Figure 14

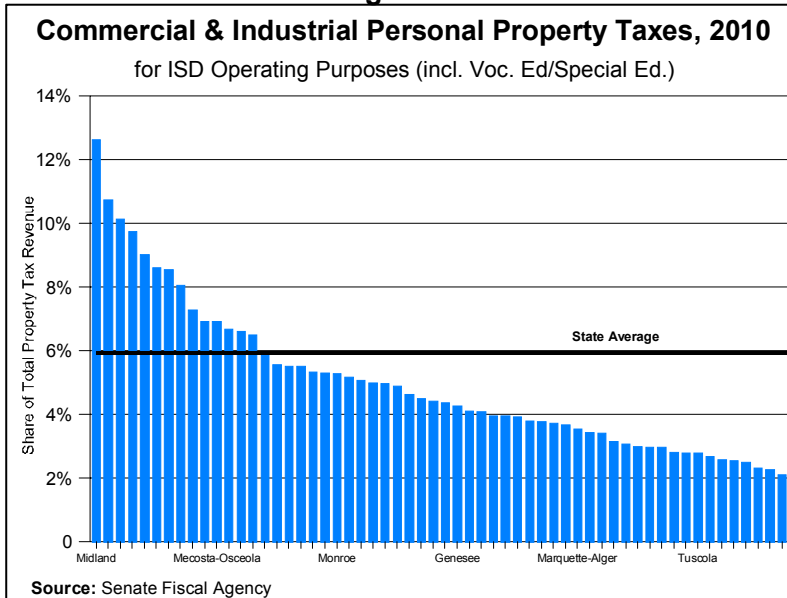

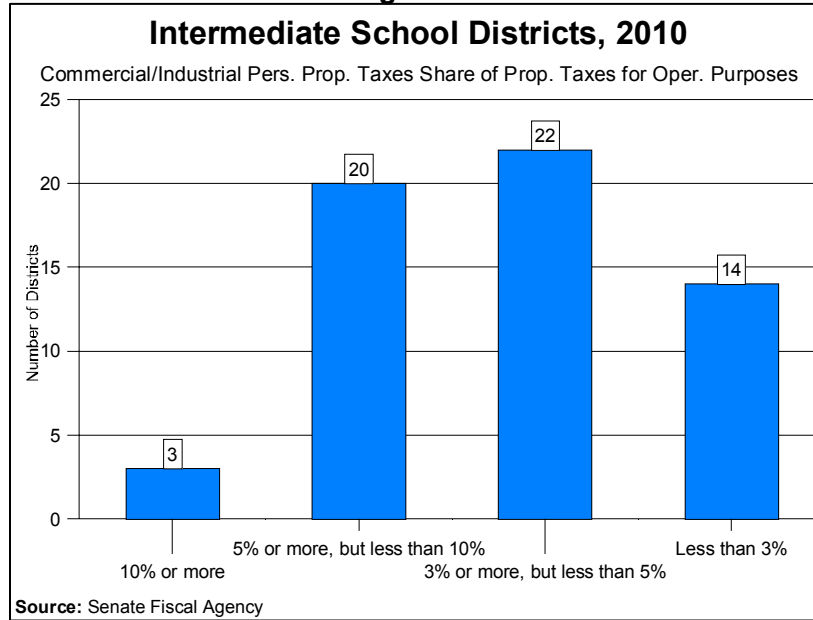

Figure 15

Most ISDs do not levy mills specifically directed at debt repayment. However, commercial personal property taxes accounted for 3.5% of the property tax revenue the Kalamazoo Valley ISD received in 2010 to pay toward debt, while industrial personal property taxes accounted for 6.3%.

Table 7 (in Appendix) provides data on the impact of personal property taxes on revenue received for operating purposes, by ISD and type of personal property. Table 8 (in Appendix) provides similar data but for property taxes received for debt repayment. Table 9 (in Appendix) and Table 10 (in Appendix) break the data shown in Table 7 down into the levy from allocated mills and the levy for special education and vocational mills. As indicated earlier, it is not possible to fully estimate the impact of property taxes on utility personal property on an ISD-by-ISD basis. The estimates shown in Tables 7, 8, 9 and 10, as discussed in each table's notes, show the minimum impact for each ISD. The totals at the end of the tables show the total for the minimum figure, as well as an adjusted total for the State that reflects all utility personal property. On average, utility personal property is estimated to account for 2.0% of property tax revenue received by ISDs for operating purposes in 2010, and 0.4% of the property tax revenue received to repay debt.

Similarly, community colleges vary in their reliance on personal property taxes (Figure 16). Among community colleges, Henry Ford Community College exhibited the greatest reliance on commercial personal property taxes, which accounted for 4.9% of its local levy for operating purposes in 2010, while industrial personal property taxes accounted for 8.8%. Combining commercial and industrial personal property taxes, personal property taxes accounted for more than 10.0% of property tax revenue received for operating purposes at three community colleges, between 5.0% and 10.0% at 15 community colleges, and between 3.0% and 5.0% at six community colleges (Figure 17). For the remaining four community colleges, commercial and industrial property taxes accounted for less than 3.0% of the property tax revenue received for operating purposes.

Like ISDs, few community colleges levy a specific millage for either debt or capital improvements. Commercial personal property taxes accounted for 3.1% of the property tax revenue Mott Community College received to pay toward debt in 2010, while industrial personal property taxes accounted for 8.2% of the property tax revenue the Bay De Noc Community College received to pay debt.

Figure 16

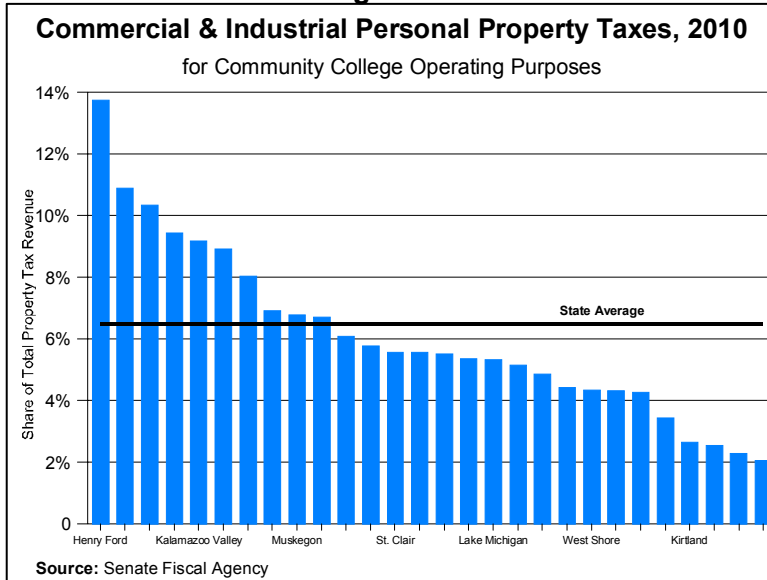

Figure 17

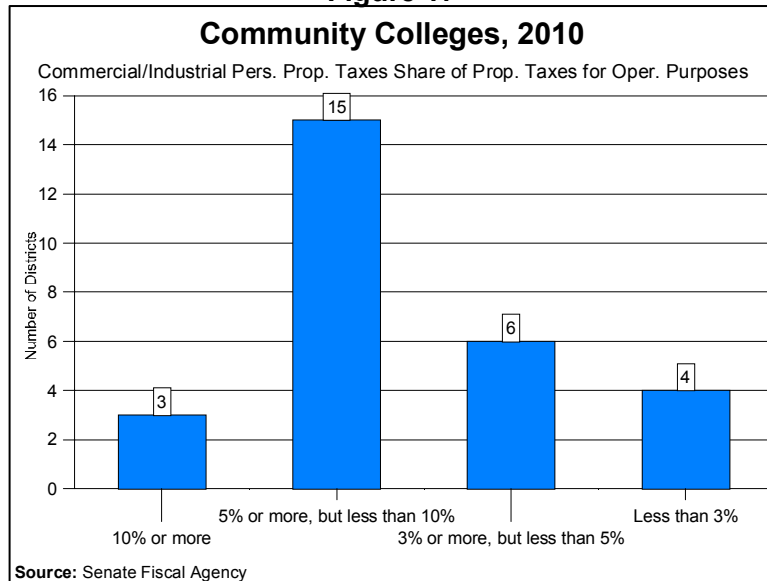

Table 11 (in Appendix) provides data on the impact of personal property taxes on revenue received for operating purposes, by community college and type of personal property. Table 12 (in Appendix) provides similar data but for property taxes received for debt repayment. As indicated earlier, it is not possible to fully estimate the impact of property taxes on utility personal property on a community college-by-community college basis. The estimates shown in Tables 11 and 12, as discussed in each table's notes, show the minimum impact for each community college. The totals at the end of the tables show the total for the minimum figure, as well as an adjusted total for the State that reflects all utility personal property. On average, utility personal property is estimated to account for 2.2% of property tax revenue received by community colleges for operating purposes in 2010, and 2.8% of the property tax revenue received to repay debt.

County reliance on personal property taxes is somewhat less varied than that exhibited by local school districts, and more similar to the degree of variance exhibited by ISDs and community colleges (Figure 18). Among counties, Wayne County exhibited the greatest reliance on commercial personal property

taxes, which accounted for 4.0% of its local levy for operating purposes in 2010, while Dickinson County exhibited the greatest reliance on industrial personal property taxes, which accounted for 11.7% of its local levy for operating purposes. Personal property taxes, from all classes of property, accounted for 20.4% of property taxes levied for operating purposes in Kalkaska County in 2010. Combining commercial, industrial, and utility personal property taxes, personal property taxes accounted for more than 20.0% of property tax revenue received for operating purposes in one county (Kalkaska), between 10.0% and 20.0% in 17 counties, between 5.0% and 10.0% in 52 counties, and between 3.0% and 5.0% in 11 counties (Figure 19). For the remaining two counties, personal property taxes accounted for less than 3.0% of the property tax revenue received for operating purposes.

Figure 18

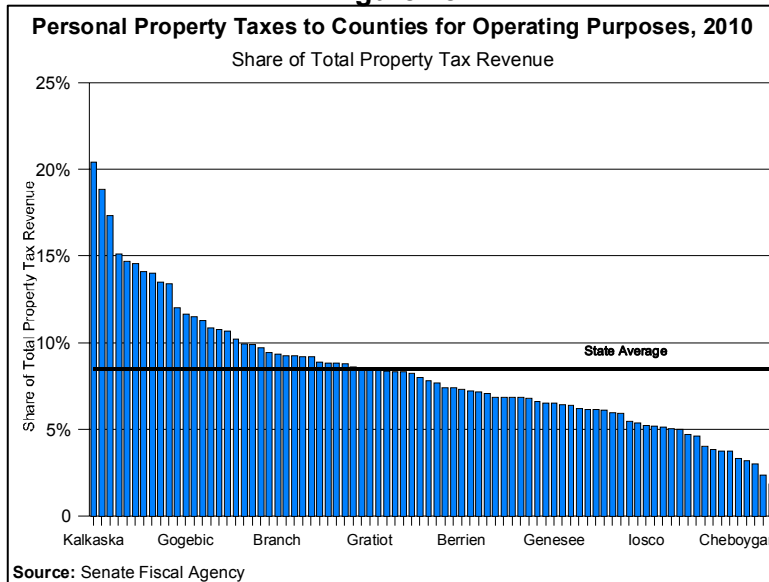

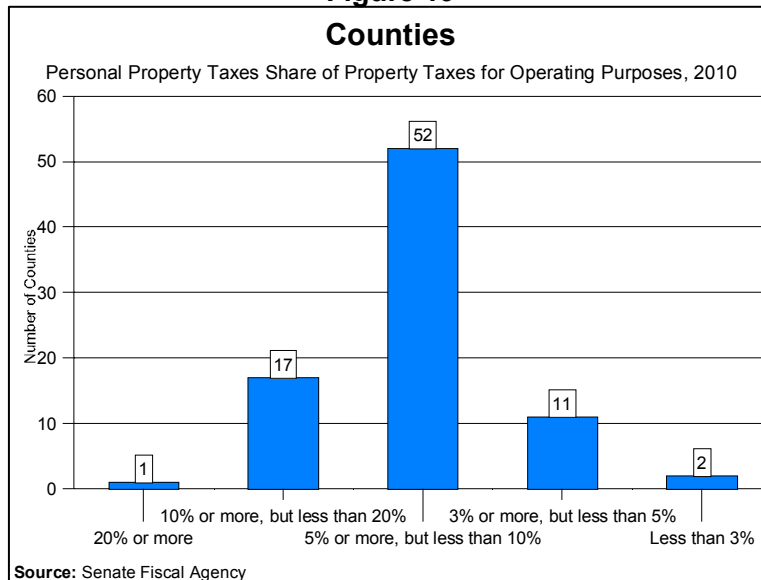

Figure 19

Only 16 counties levy a mill specifically dedicated to debt repayment (Figure 20). Commercial personal property taxes account for 3.9% of the property tax revenue Saginaw County receives to pay toward debt, while industrial personal property taxes account for 42.8% of the property tax revenue Kalamazoo County receives to pay debt. Personal property taxes, from all classes of property, account for 20.4%

of property taxes levied to pay debt in Kalkaska County. Combining commercial, industrial, and utility personal property taxes, personal property taxes accounted for more than 20.0% of property tax revenue received for debt repayment in one county (Kalkaska), between 10.0% and 20.0% in three counties, between 5.0% and 10.0% in nine counties, and between 3.0% and 5.0% in three counties (Figure 21). The remaining 67 counties do not levy a dedicated millage for debt repayment.

Figure 20

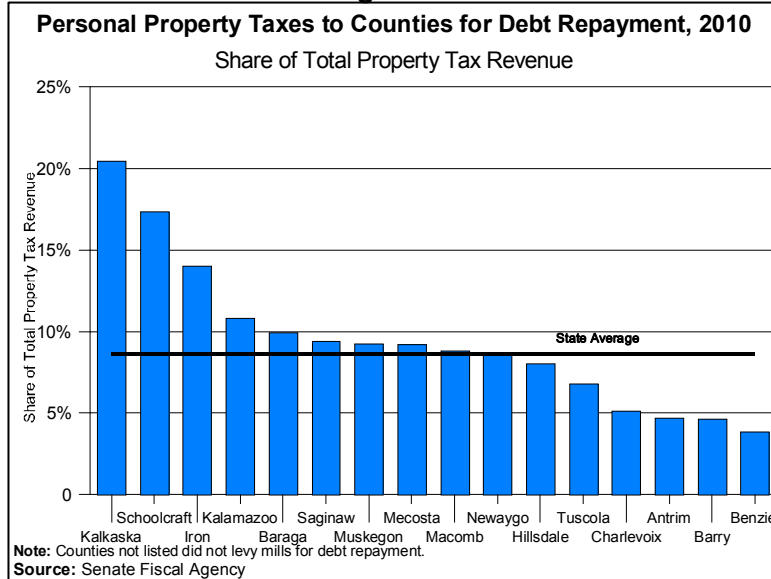

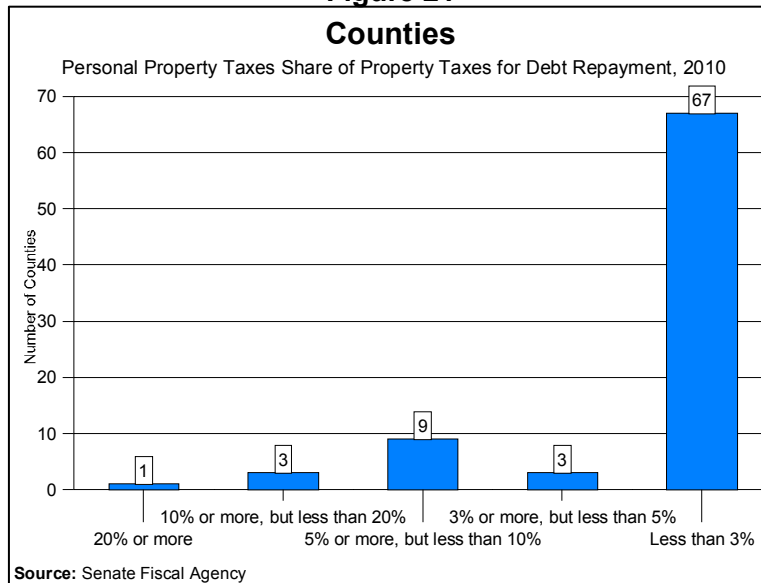

Figure 21

The reliance on personal property taxes by cities bears more resemblance to the wide variance exhibited by local school districts (Figure 22). Among cities, Southfield exhibited the greatest reliance on commercial personal property taxes, which accounted for 11.7% of its local levy for operating purposes in 2010, while Litchfield exhibited the greatest reliance on industrial personal property taxes, which accounted for 45.3% of its local levy for operating purposes. Personal property taxes, from all classes of property, accounted for 56.8% of property taxes levied for operating purposes in River Rouge in 2010. Commercial property taxes accounted for more than 5.0% of local property taxes for operating purposes in 52 cities, while industrial personal property taxes accounted for more than 20.0%

of local property taxes for operating purposes in 16 cities. Combining commercial, industrial, and utility personal property taxes, personal property taxes accounted for more than 20.0% of property tax revenue received for operating purposes in 31 cities, between 10.0% and 20.0% in 86 cities, between 5.0% and 10.0% in 108 cities, and between 3.0% and 5.0% in 41 cities (Figure 23). For the remaining 28 cities, personal property taxes accounted for less than 3.0% of the property tax revenue received for operating purposes.

Figure 22

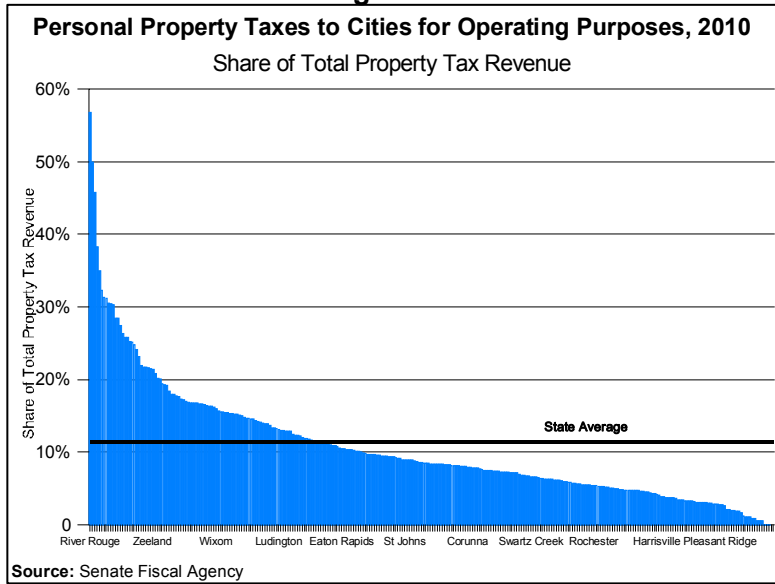

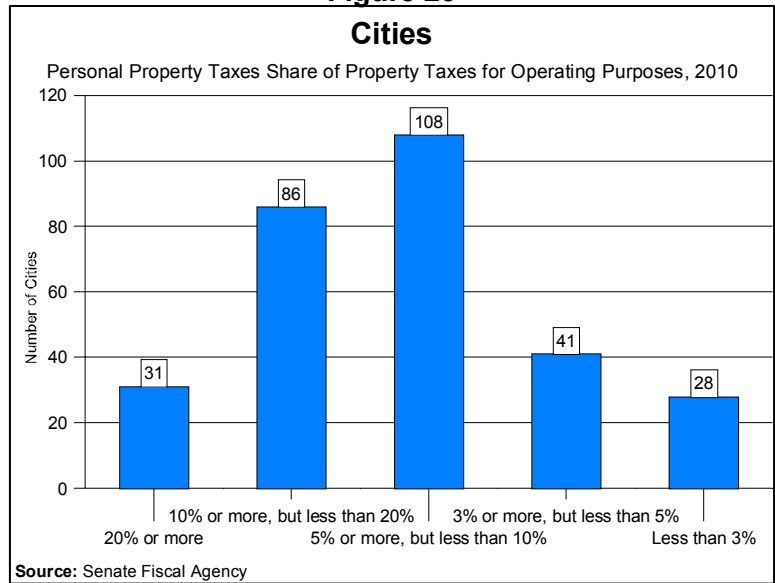

Figure 23

The reliance on personal property taxes to repay debt at the city level follows the same variability as that for operating purposes, with the only differences essentially reflecting whether a city levies a millage dedicated to debt repayment (Figure 24). Commercial personal property taxes accounted for 11.7% of the property tax revenue Southfield received to pay toward debt in 2010, while industrial personal property taxes accounted for 41.1% of the property tax revenue Ecorse received to pay debt. Personal property taxes, from all classes of property, accounted for 56.8% of property taxes levied to pay debt in River Rouge. Commercial property taxes accounted for more than 5.0% of local property

taxes to pay debt in 21 cities, while industrial personal property taxes accounted for more than 20% of local property taxes to pay debt in four cities. Combining commercial, industrial, and utility personal property taxes, personal property taxes accounted for more than 20% of property tax revenue received for debt repayment in eight cities, between 10.0% and 20.0% in 34 cities, between 5.0% and 10.0% in 36 cities, and between 3.0% and 5.0% in 20 cities (Figure 25). For the remaining 196 cities (180 of which do not levy a special millage dedicated to debt repayment), personal property taxes accounted for less than 3% of the property tax revenue received for debt repayment.

Figure 24

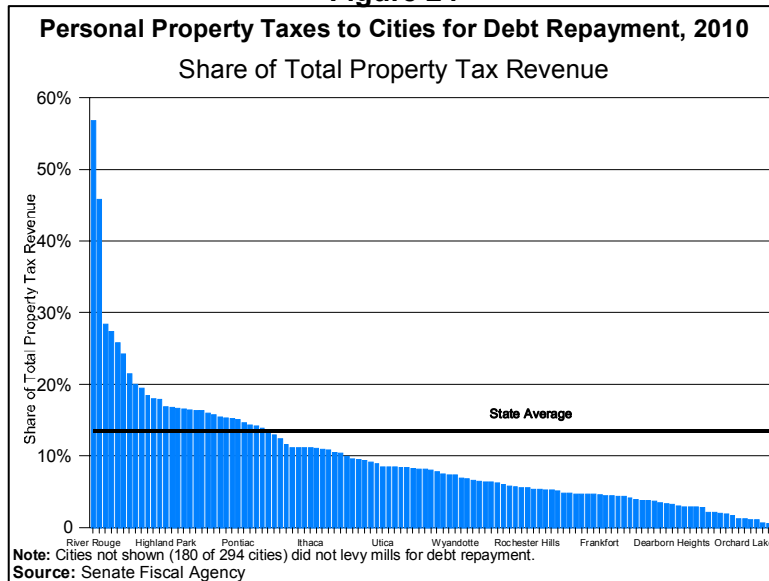

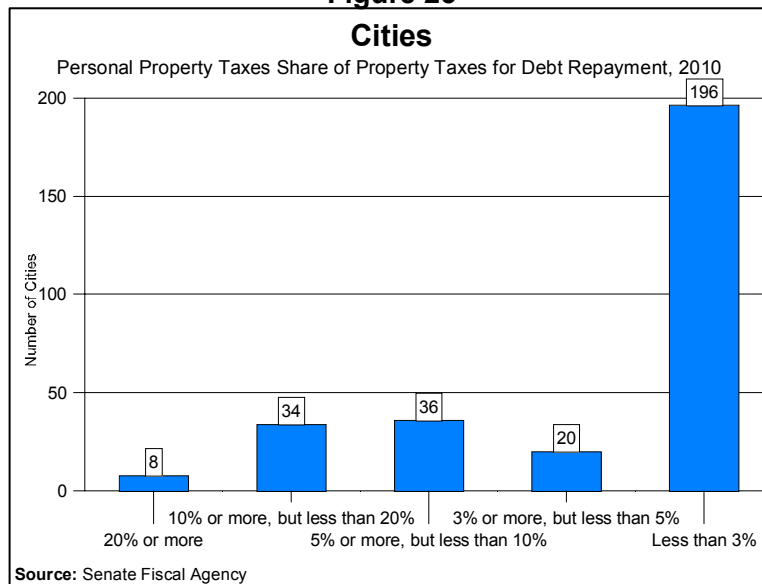

Figure 25

As indicated earlier, data are not available for personal property taxes received by villages.

Townships exhibit even greater variability in their reliance on personal property taxes than cities do (Figure 26). Among townships, Gilmore Township in Benzie County exhibited the greatest reliance on commercial personal property taxes, which accounted for 28.9% of its local levy for operating purposes in 2010, while Chandler Township in Charlevoix County exhibited the greatest reliance on industrial

personal property taxes, which accounted for 41.2% of its local levy for operating purposes. Personal property taxes, from all classes of property, accounted for 62.0% of property taxes levied for operating purposes in Winterfield Township in Clare County in 2010. Commercial property taxes accounted for more than 5.0% of local property taxes for operating purposes in 37 townships in 2010, while industrial personal property taxes accounted for more than 20.0% of local property taxes for operating purposes in nine townships. Combining commercial, industrial, and utility personal property taxes, personal property taxes accounted for more than 20.0% of property tax revenue received for operating purposes in 54 townships, between 10% and 20.0% in 168 townships, between 5.0% and 10.0% in 354 townships, and between 3.0% and 5.0% in 372 townships (Figure 27). For the remaining 292 townships, personal property taxes accounted for less than 3.0% of the property tax revenue received for operating purposes.

Figure 26

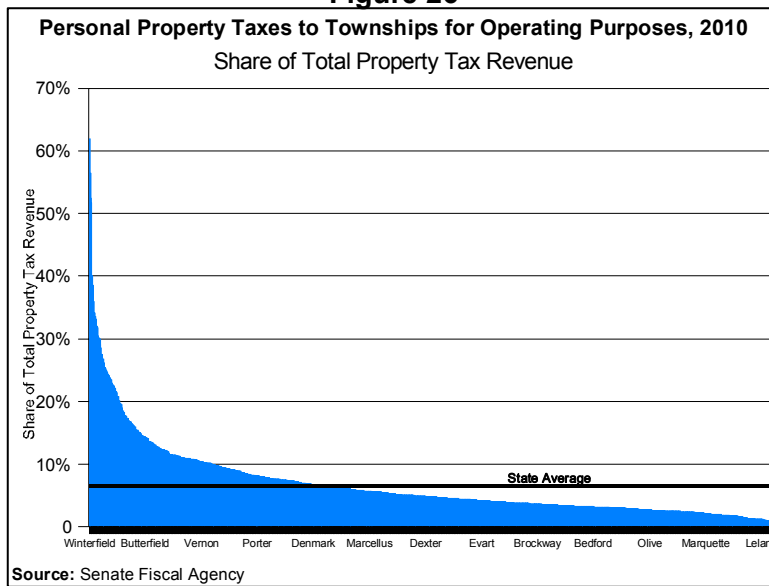

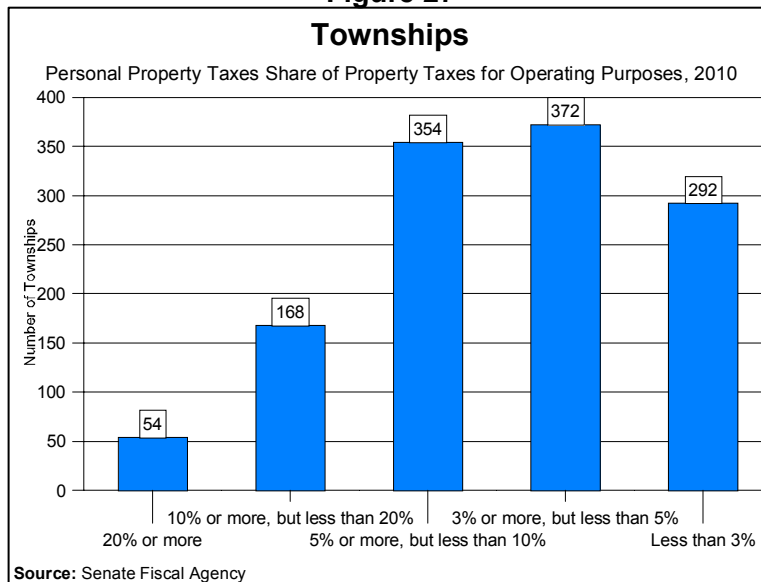

Figure 27

As with cities, the reliance on personal property taxes to repay debt at the township level follows the same variability as that for operating purposes, with the only differences essentially reflecting whether a township levies a millage dedicated to debt repayment (Figure 28). Commercial personal property taxes accounted for 4.0% of the property tax revenue Dundee Township in Monroe County received to pay toward debt in 2010, while industrial personal property taxes accounted for 26.6% of the property tax revenue Covert Township in Van Buren County received to pay debt. Personal property taxes, from all classes of property, accounted for 28.5% of property taxes levied to pay debt in Covert Township in 2010.

Commercial property taxes accounted for more than 3.0% of local property taxes to pay debt in only three townships, while industrial personal property taxes accounted for more than 5.0% of local property taxes to pay debt in eight townships. Combining commercial, industrial, and utility personal property taxes, personal property taxes accounted for more than 20.0% of property tax revenue received for debt repayment in two townships, between 10.0% and 20.0% in eight townships, between 5.0% and 10.0% in 16 townships, and between 3.0% and 5.0% in 10 townships (Figure 29). For the remaining 1,204 townships, personal property taxes accounted for less than 3% of the property tax revenue received for debt repayment.

Figure 28

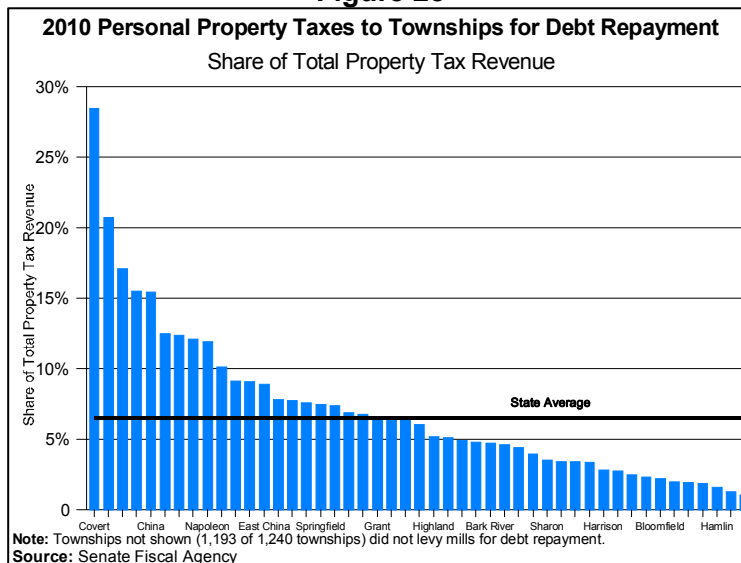

Figure 29

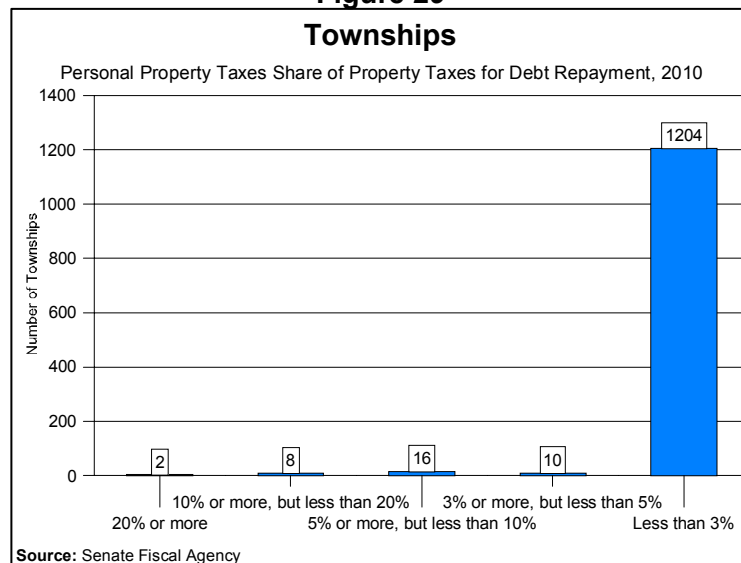

Table 13 (in Appendix) provides data on the impact of personal property taxes on revenue received for operating purposes, by county, city, and township, and by type of personal property. Table 14 (in Appendix) provides similar data but for property taxes received for debt repayment. Table 15 (in Appendix) provides data for regional authorities based on authorities operating within cities and townships. Unlike the tables for local school districts, ISDs, and community colleges, accurate information is available regarding utility personal property within each local unit, and thus the values presented are actual values, rather than minimum values; and the totals for the State do not require an adjustment factor to sum to the correct total.

TAXATION OF PERSONAL PROPERTY IN OTHER STATES

Most states tax tangible personal property, although 10 states completely exempt personal property from property taxes. Table 16 indicates that in addition to these 10 states, another three states exempt a substantial portion of personal property from taxation. Utility personal property is the classification of personal property most commonly not exempted by states that exempt all or most personal property from property taxes.

IMPLICATION FOR PROPERTY TAXES ON REAL PROPERTY

Under the Michigan Constitution, local units of government are required to reduce millage rates if the growth in revenue from property taxes, adjusting for losses and additions, exceeds the rate of inflation. As indicated earlier, real property values tend to rise over time, although the value of personal property tends to be stable or declining. As a result, the personal property tax base tends to offset some of the growth in revenue that would occur if personal property were exempt from taxation. As a result, millage rollbacks occur less frequently than they would if personal property were exempt from property taxes.

Millages subject to rollback under the constitutional provisions affect both personal and real property. If personal property were to be exempt from taxation, millage rollbacks would occur more frequently and thus reduce the amount of revenue taxing authorities would receive from real property. Philip Mastin, the Director of Assessment and Equalization for Wayne County, published a paper in the September 2011 issue of *The Michigan Assessor* discussing this issue and estimating the impact on both Wayne County and the City of Detroit. The paper indicates that, based on 2006 taxable values, if personal property had been exempt from taxation, millage reduction rollbacks would have reduced revenue to Wayne County by \$2.8 million in the first year, and revenue to the City of Detroit would have been reduced by \$4.2 million in the first year. The paper reports that using 2005 data, Oakland County would have received \$2.3 million less in revenue in the first year, while Macomb County estimated that additional rollbacks would have occurred in 31 of 58 taxing jurisdictions, using 2007 data. Because millage rollbacks are essentially permanent (as increasing the rate would require an election), the revenue losses would increase and compound over time.

Table 16

Personal Property Taxation by State		
State	Tangible Personal Property	Comments
Alabama	Taxable	
Alaska	Taxable	
Arizona	Taxable	
Arkansas	Taxable

Wisconsin	Exempts Substantial Portion	Most property exempt, including manufacturers' machinery
Wyoming	Taxable	

Source: Office of Revenue and Tax Analysis, Michigan Department of Treasury, August 2011

CONCLUSION

This paper has provided detail on the contribution of personal property taxes to various taxing authorities, using 2010 data. Personal property taxes account for approximately \$1.3 billion in revenue to State and local taxing jurisdictions. Regardless of the level of the taxing authority, or the level of taxation, significant variations exist between local units in their reliance on personal property taxes. Similarly, even local units that exhibit the same degree of reliance on overall personal property taxes may differ from each other significantly, because one local unit may receive substantial revenue from commercial personal property while another local unit receives the revenue from industrial or utility personal property.

Like Michigan, most states tax tangible personal property, although many of the states that provide complete or significant exemptions are major manufacturing states in the Great Lakes region. In states that provide significant exemptions for personal property, utility personal property is the most common class of property to remain taxed.

Any reduction or elimination of personal property taxes in Michigan holds the potential to have significant consequences. Depending on the local unit, personal property taxes provide substantial revenue for operating purposes and repayment of bonds. Not only do many local units and taxing jurisdictions rely heavily on personal property taxes, in many cases they may face constitutional or statutory restrictions on their ability to increase other millage rates to offset the loss of revenue, if personal property taxes were substantially lowered or eliminated. Furthermore, any reduction in personal property taxes holds the potential to impact the millage rates levied on real property as well.

Policy-makers will face a challenge in addressing the issue of personal property taxes. Some taxing authorities would appear to be able to absorb a significant or complete elimination of personal property taxes with little or no difficulty, while the ability of other local units to continue as viable entities would be seriously jeopardized. As with the change in the taxation of business inventories, which was eliminated in 1976, the State could endeavor to replace the revenue through some mechanism such as revenue sharing. Similarly, when Michigan adopted its new Constitution in 1963, local units were granted greater taxing authority; and local units could be provided either a statutory or a constitutional means to offset all or a portion of any revenue loss attributable to the elimination of personal property taxes. Other states have implemented personal property tax relief by combining state assistance with phase-in periods that incrementally either lowered rates or exempted progressively greater amounts of property from taxation. If Michigan chooses to pursue significant changes to the taxation of personal property, regardless of how it is implemented, the transition will likely raise significant issues for both taxing jurisdictions and taxpayers.

* Utility personal property is only available at the county/city/township level. Amounts shown include only those local units within the boundaries of the local school district with a single school district within the unit's boundaries, and thus underestimate the totals for those lines. Statewide, taxes on utility personal property that were able to be allocated to these units accounted for only \$2.1 billion of the total \$7.7 billion in utility personal property taxable value statewide, and \$60.9 million of \$232.6 million in personal property taxes levied by units other than counties, cities, and townships. The estimates in this table for each local school district, and on the line "Total for State (Based on data in table)", are not adjusted so that they sum to the property total, and instead represent the minimum totals for each local school district. The line "Total for State (Aggregate Estimates)" provides the estimated totals, adjusting for data that cannot be accurately attributed to a particular local school district.

* Utility personal property is only available at the county/city/township level. Amounts shown include only those local units within the boundaries of the local school district with a single school district within the unit's boundaries, and thus underestimate the totals for those lines. Statewide, taxes on utility personal property that were able to be allocated to these units accounted for only \$2.1 billion of the total \$7.7 billion in utility personal property taxable value statewide, and \$60.9 million of \$232.6 million in personal property taxes levied by units other than counties, cities, and townships. The estimates in this table for each local school district, and on the line "Total for State (Based on data in table)", are not adjusted so that they sum to the property total, and instead represent the minimum totals for each local school district. The line "Total for State (Aggregate Estimates)" provides the estimated totals, adjusting for data that cannot be accurately attributed to a particular local school district.

Notes:

* Utility personal property is only available at the county/city/township level. Amounts shown include only those local units within the boundaries of the ISD's district with a single school district within the unit's boundaries, and thus underestimate the totals for those lines. Statewide, taxes on utility personal property that were able to be allocated to these units accounted for only \$2.1 billion of the total \$7.7 billion in utility personal property taxable value statewide, and \$60.9 million of \$232.6 million in personal property taxes levied by units other than counties, cities, and townships. The estimates in this table for each ISD, and on the line "Total for State (Based on data in table)", are not adjusted so that they sum to the property total, and instead represent the minimum totals for each ISD. The line "Total for State (Aggregate Estimates)" provides the estimated totals, adjusting for data that cannot be accurately attributed to a particular ISD.

** The Lakewood School District within this ISD does not pay the vocational education millage.

* Utility personal property is only available at the county/city/township level. Amounts shown include only those local units within the boundaries of the ISD's district with a single school district within the unit's boundaries, and thus underestimate the totals for those lines. Statewide, taxes on utility personal property that were able to be allocated to these units accounted for only \$2.1 billion of the total \$7.7 billion in utility personal property taxable value statewide, and \$60.9 million of \$232.6 million in personal property taxes levied by units other than counties, cities, and townships. The estimates in this table for each ISD, and on the line "Total for State (Based on data in table)", are not adjusted so that they sum to the property total, and instead represent the minimum totals for each ISD. The line "Total for State (Aggregate Estimates)" provides the estimated totals, adjusting for data that cannot be accurately attributed to a particular ISD.

** The Lakewood School District within this ISD does not pay the vocational education millage.

Total for State (Based on data in table)*		\$373,271,756	\$11,526,804	3.1%	\$11,449,926	3.1%	\$1,544,318	0.4%	6.6%
Total for State (Aggregate Estimates)*		\$373,271,756	\$11,526,804	3.1%	\$11,449,926	3.1%	\$5,899,897	1.6%	7.7%

Notes:

- * Many of the authorities included cover more than a single local unit, such as a regional transit authority or police/fire authority. The data shown indicate the total amount paid to all authorities with the ability to levy taxes on property within the local unit.
- ** Utility personal property is only available at the county/city/township level. Amounts shown include only those local authorities within the boundaries of a city or township with a single school district within the city's or township's boundaries, and thus underestimate the totals for those lines. Statewide, taxes on utility personal property that were able to be allocated to these units accounted for only \$2.1 billion of the total \$7.7 billion in utility personal property taxable value statewide, and \$60.9 million of \$232.6 million in personal property taxes levied by units other than counties, cities, and townships. The estimates in this table for each local unit, and on the line "Total for State (Based on data in table)", are not adjusted so that they sum to the property total, and instead represent the minimum totals for each city or township. The line "Total for State (Aggregate Estimates)" provides the estimated totals, adjusting for data that cannot be accurately attributed to a particular local unit.
