Michigan State Government Debt

By Gary S. Olson, Director, and Jessica M. Clark, Intern

The Michigan Constitution of 1963 provides the State of Michigan with the ability to raise cash through the issuance of long-term debt. The cash is raised through the issuance of bonds on the capital markets by the State. The debt issued by the Michigan State government falls into two broad categories. General obligation bonds are debt instruments backed by the full faith and credit of the State. Nongeneral obligation bonds are debt instruments backed by dedicated restricted revenue sources.

General obligation bonds are issued pursuant to Sections 15 and 16 of Article IX of the State Constitution. Section 15 authorizes the State to borrow money for specific purposes only after a positive two-thirds vote of the members serving in the House of Representatives and the Senate and a positive vote of the electors in a general election. Section 16 authorizes the State to borrow funds for the purpose of making loans to school districts. These bonds also are backed by the full faith and credit of the State. Current examples in Michigan are bonds issued for environmental cleanup programs and public recreation bonds.

Nongeneral obligation bonds are issued pursuant to Sections 9 and 13 of Article IX of the State Constitution. These sections enable public bodies to issue bonds subject to constitutional restrictions and State law. These bonds are backed by dedicated revenue sources and are not guaranteed by the full faith and credit of the State. Current examples in Michigan are bonds issued by the State Building Authority and the Michigan State Housing Development Authority.

This Senate Fiscal Agency (SFA) *State Notes* article provides a summary of the current level of debt issued by the Michigan State government. Included is a discussion of the current types of bonds outstanding and the recent history of the level of debt outstanding. The article also provides a comparison of the level of State debt outstanding in Michigan and in other states. Finally, the article reviews the State budget impact of debt service payments on certain outstanding State bonds.

Michigan Government Debt Outstanding

The State of Michigan had \$23.2 billion of debt outstanding on September 30, 2008. This includes general obligation bonds totaling \$1.5 billion and nongeneral obligation bonds totaling \$21.7 billion. [Table 1](#) provides a summary of the general obligation and nongeneral obligation bonds outstanding on September 30, 2008. Bonds issued for loans to school districts totaled \$502.7 million or 34.0% of the total general obligation debt outstanding. The remainder of the general obligation debt outstanding consisted of public recreation bonds - \$16.3 million; environmental protection bonds - \$437.8 million; Clean Michigan Initiative bonds - \$464.2 million; and Great Lakes Water Quality bonds - \$56.3 million. Michigan voters authorized the public recreation bonds and the environmental protection bonds in November 1988, the Clean Michigan Initiative bonds in November 1998, and the Great Lakes Water Quality bonds in November 2002.

Total Nongeneral Obligation Debt.....	\$21,757,858
Total State Government Debt	\$23,213,032

Source: Annual Report of the Michigan State Treasurer

The nongeneral obligation debt of \$21.8 billion outstanding on September 30, 2008, consisted of debt issued by numerous State agencies and special authorities created by the State. The following information provides a summary of these nongeneral obligation bond issues.

Michigan Department of Transportation Bonds: Article IX, Section 9 of the State Constitution authorizes the issuance of bonds by the Department of Transportation to support transportation projects across the State. The debt service on these bonds is paid from dedicated transportation revenue. In fiscal year (FY) 2007-08, the shorter-term grant anticipation notes that were previously issued were replaced with the longer-term grant anticipation bonds under the same program. As of September 30, 2008, there were \$2.2 billion of bonds outstanding.

Michigan State Park Revenue Bonds: The Department of Natural Resources was granted the authority to issue revenue bonds for State parks by Public Act 149 of 1960. The debt service on these bonds is paid from State park-generated revenue. As of September 30, 2008, there were \$12.8 million of bonds outstanding.

Mackinac State Park Revenue Bonds: The Mackinac State Park Commission was granted the authority to issue revenue bonds by Public Act 58 of 1995. The debt service on these bonds is paid from revenue generated at the facilities operated by the Mackinac State Park Commission. As of September 30, 2008, there were \$1.1 million of bonds outstanding.

Michigan State Housing Development Authority Bonds: The Michigan State Housing Development Authority was created by Public Act 38 of 1969, to issue bonds and notes to finance housing for sale or rental to families with low to moderate incomes and to finance home improvements. The debt service on these bonds is paid from mortgage payments and rental charges from housing projects. As of September 30, 2008, there were \$2.4 billion bonds outstanding.

Hospital Finance Authority Bonds: Michigan's State Hospital Finance Authority was created by Public Act 38 of 1969, for the purpose of lending money to nonprofit, nonpublic hospitals and health care corporations. The authority uses the volume of borrowing available to receive lower interest rates that are in turn passed on to the health care corporations. The debt service on these bonds is paid from the loan repayments from hospitals. As of September 30, 2008, there were \$5.3 billion of bonds outstanding.

Michigan Higher Education Facilities Authority Bonds: The Michigan Higher Education Facilities Authority was created by Public Act 295 of 1969, for the purpose of assisting private nonprofit institutions of higher education in financing facilities on their campuses. The debt service on these bonds is paid from the loan repayments from colleges. As of September 30, 2008, there were \$618.3 million of bonds outstanding.

Michigan Higher Education Student Loan Authority Bonds: The Michigan Higher Education Student Loan Authority was created by Public Act 222 of 1975, for the purpose of making loans to qualified students attending higher educational institutions in the State. The debt service on these bonds is paid from the loan repayments from students once their education is completed. As of September 30, 2008, there were \$2.3 billion of bonds outstanding.

Michigan Municipal Bond Authority Bonds: The Michigan Municipal Bond Authority was created by Public Act 227 of 1985, to assist local units of government in reducing their financing costs for public improvements, deficit reductions, and various other municipal purposes. The authority pools the borrowing needs of various local units of government and issues bonds that are used to make loans to local units. The debt service on these bonds is paid from the loan repayments from local units of government. As of September 30, 2008, there were \$4.3 billion of bonds outstanding.

State Building Authority Bonds: The State Building Authority was created by Public Act 183 of 1964, to issue bonds to finance the acquisition or renovation of buildings for use by the State or public institutions of higher education. The debt service on these bonds is paid by rental charges levied against the occupants of the buildings. As of September 30, 2008, there were \$3.4 billion of bonds outstanding.

Michigan Public Education Facilities Authority Bonds: The Michigan Public Education Facilities Authority was created by Executive Reorganization Order 2002-3, which transferred certain bonding functions of the Michigan Strategic Fund to the new authority. The authority issues bonds for public school building projects. The debt service on these bonds is paid from

the revenue loaned to school districts. As of September 30, 2008, there were \$127.8 million of bonds outstanding.

Michigan Tobacco Settlement Finance Authority Bonds: The Michigan Tobacco Settlement Finance Authority was created by Public Act 226 of 2005, for the purpose of making loans and grants to encourage economic development projects in Michigan. The debt service on these bonds is paid from revenue the State is receiving from the 1999 settlement between 46 states and the United States tobacco industry. As of September 30, 2008, there were \$1.1 billion of bonds outstanding.

Historical Levels of Michigan State Government Debt

The amount of debt held by the Michigan State government has grown considerably in recent years. Table 2 provides a summary of the amount of general obligation and nongeneral obligation State debt outstanding at the close of each fiscal year beginning in FY 1978-79. Total debt outstanding at the close of FY 1978-79 was \$2.2 billion. Over the next 29 fiscal years, the level of State debt outstanding increased to \$23.2 billion. During this time period, the growth in nongeneral obligation debt exceeded the growth in general obligation debt. In FY 1978-79, general obligation debt accounted for 21.6% of the total State debt outstanding. By FY 2007-08, general obligation debt accounted for only 6.4% of the total State debt outstanding.

In order to analyze the growth in State government debt in recent years, Figure A provides a graphical summary of the growth in State government debt, Michigan personal income, and State appropriations, as measured by State Spending from State Resources, over the period FY 1996-97 through FY 2007-08. Michigan personal income is the best available measure of the growth in the Michigan economy as a whole. Over this 12-fiscal year period, State government debt increased 106.4%, while Michigan personal income increased 42.0% and State Spending from State Resources appropriations increased 32.0%. The growth in State government debt significantly exceeded the growth in the Michigan economy and State appropriations over this time period.

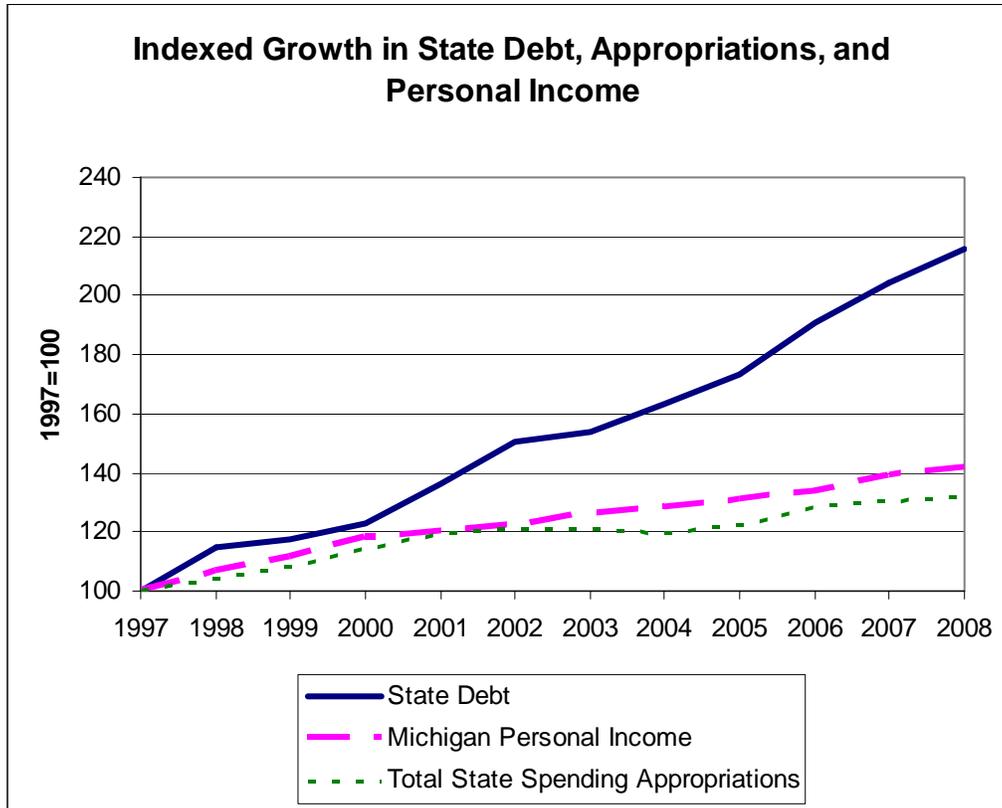

Table 2

Michigan State Government Debt Outstanding September 30 of Each Year (dollars in thousands)			
Year	State Government Debt		Total State Debt
	General Obligation	Nongeneral Obligation	
1979	\$482,500	\$1,749,940	\$2,232,440
1980	439,100	2,353,199	2,792,299
1981	409,600	2,692,335	3,101,935

State Government Debt in Michigan Compared with Other States

The United States Bureau of the Census publishes annual data regarding the levels of debt outstanding in each state. The Bureau of the Census data include both general obligation and nongeneral obligation state debt. In order to provide a meaningful comparison among states, the Bureau of the Census data also are published on a per-capita basis.

Table 3 provides the rankings of state debt per capita for the fiscal years 1980, 1990, 2000, 2005, and 2007. Over this time period, Michigan moved from a low-ranking state in debt outstanding in FY 1980, ranking 36th, to an above-average state ranking in debt outstanding in FY 2007, ranking 20th.

Michigan State Budget Impact of Debt

The majority of the debt service payments on State debt outstanding do not show up directly in the State budget. Most of the State debt outstanding in Michigan is repaid by educational institutions, local units of government, and hospitals for which the borrowing is undertaken. These repayments do not involve direct State appropriations.

The most direct impact on the State budget of debt service costs results from the repayment of general obligation bonds and bonds issued by the State Building Authority. These debt service payments are made primarily from General Fund/General Purpose appropriations and from a small amount of Federal and State Restricted funds. Table 4 provides a historical review of debt service appropriations on State Building Authority and general obligation bonds by fiscal year for the period FY 1994-95 through FY 2008-09. During FY 2008-09, debt service appropriations on bonds issued by the State Building Authority total \$231.8 million and debt service appropriations on general obligation bonds total \$83.1 million.

Table 4

Debt Service Gross Appropriations (millions of dollars)			
Fiscal Year	State Building Authority	General Obligation Bonds	Total
1994-95	\$156.9	\$43.0	\$199.9
1995-96	166.8	40.1	206.9
1996-97	205.3	64.2	269.5
