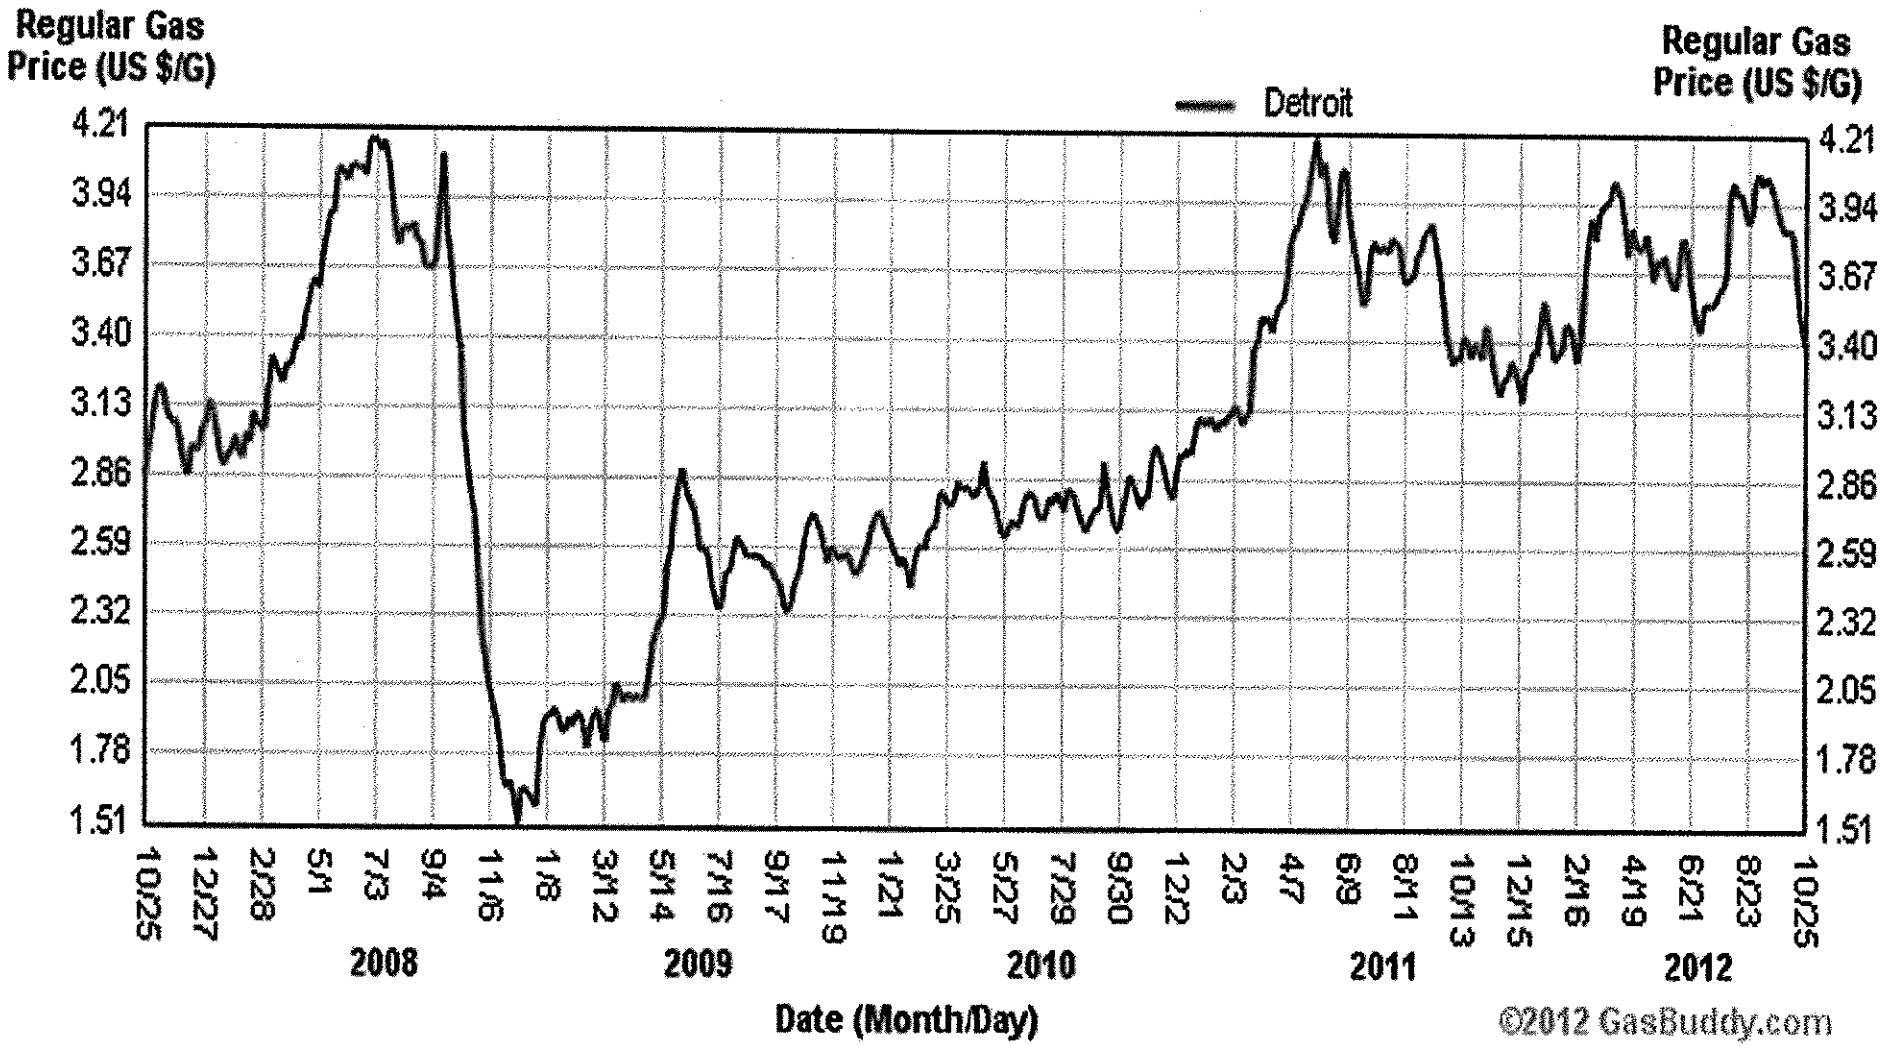
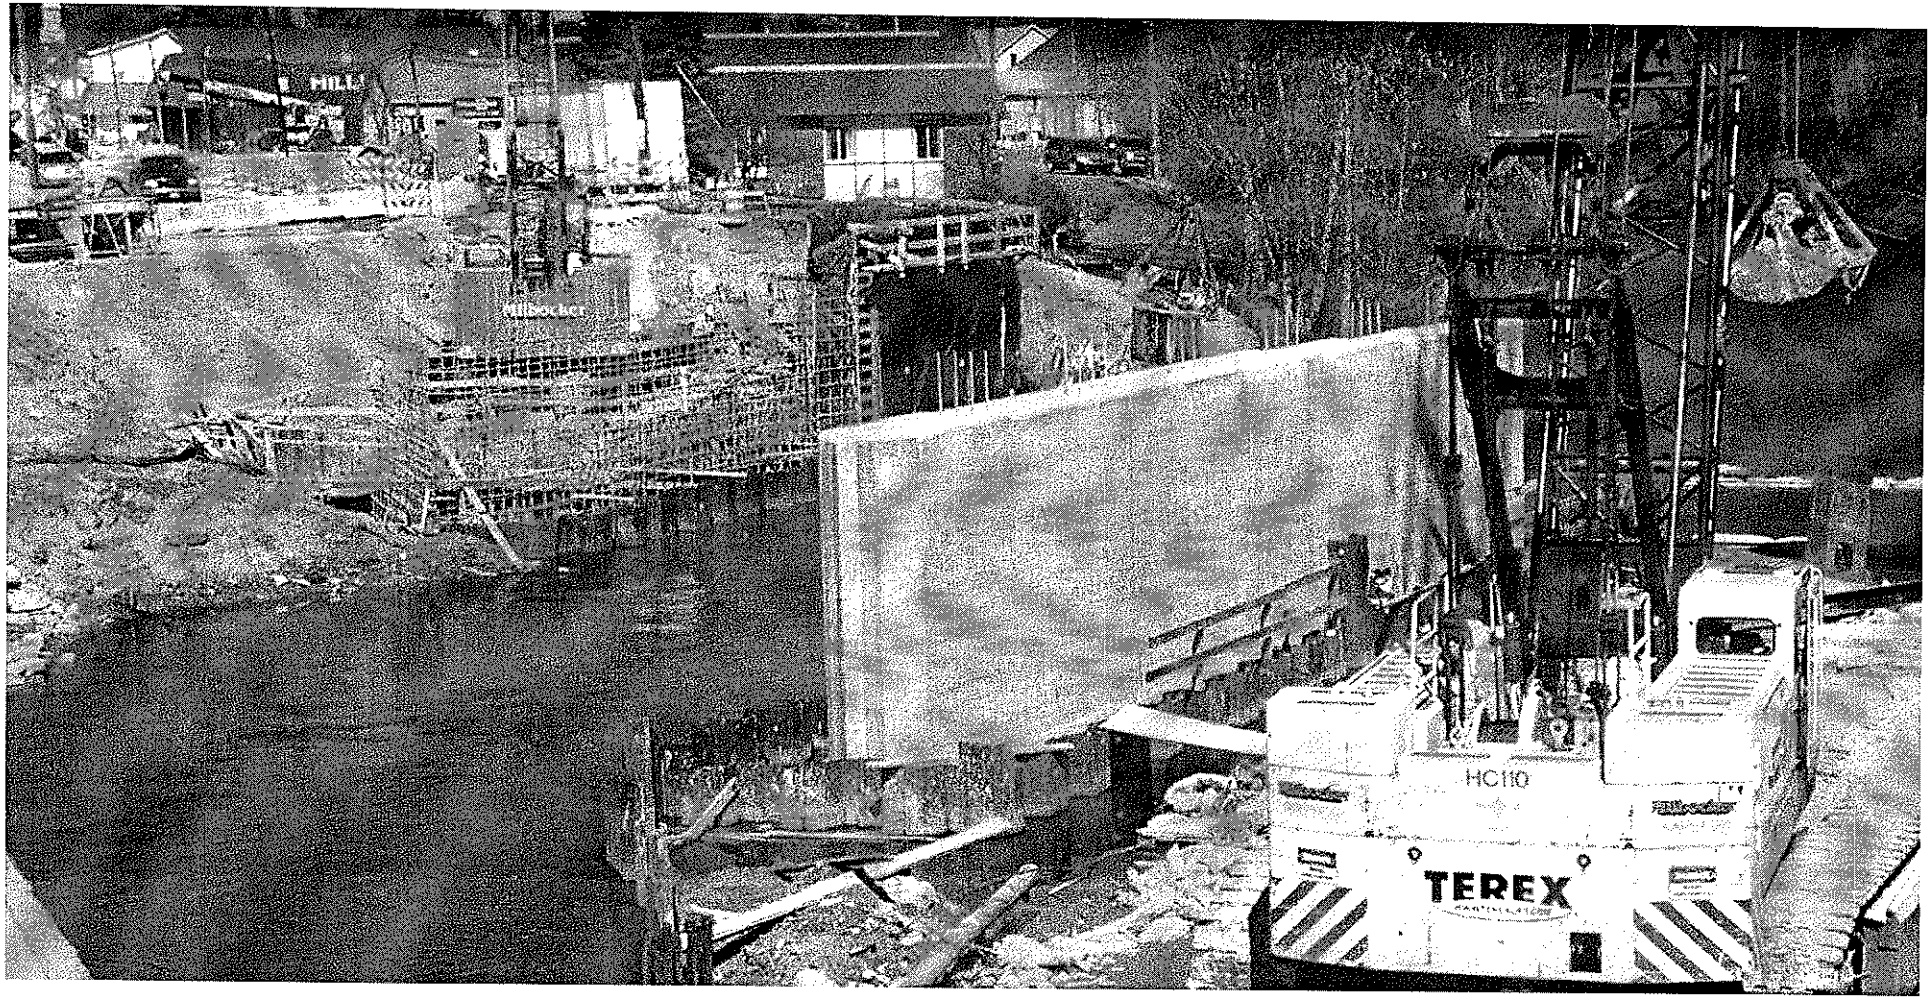
Operating Engineer Jobs accurately tracked thru Trust Fund Contributions

60 Month Average Retail Price Chart





Types of Construction Projects effected by reduced revenue

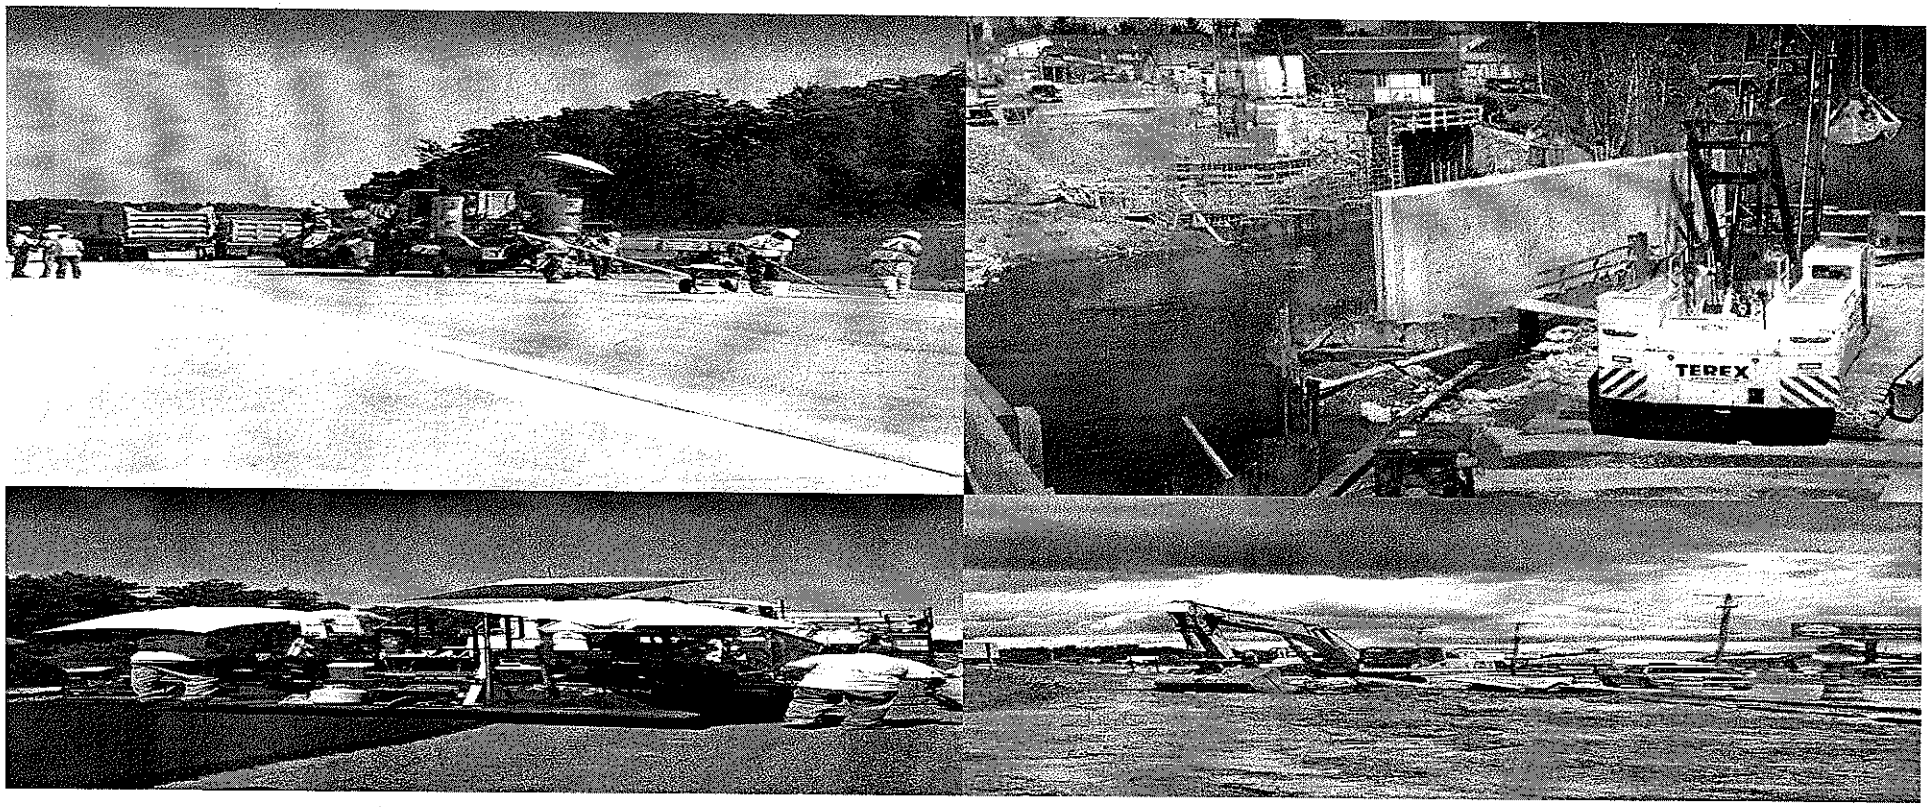
New Bridge Structure, Construction project represents approximately 12 to 15 construction jobs that last roughly 4 to 6 months.

Road rehabilitation project that creates approximately 10 or more direct construction jobs depending on size of project.

Highway Mainline & Shoulder Paving Construction Project

These types of construction projects create approximately 50 to 75 direct construction jobs over several months for each project that is built.

Road Mainline Resurfacing Construction Project, which creates approximately 15 direct construction jobs that take several weeks to complete depending on size of project.



Revenue shortfalls in the MTF will reduce or eliminate projects such as these over the next 5 to 10 years if new MTF revenue is not increased soon!

Michigan Construction Companies and Workers are falling behind just as our MTF revenue is falling behind. Companies can't plan for the future of their business with the increasing cost of equipment, fuel and construction materials. This impacts companies ability to effectively plan for the future.
